and No. 1, FIFTH-STREET, Louisville, Ky.,

and may be had gratis where

His Preparations are for Sale by Druggists and Merchants throughout the
United States, Canada, Mexico, and the West Indies.

Entered according to the Act of Congress, in the year 1855, by JOHN BULL, in the Clerk's Office, of the
District Court of the United States for the Southern District of New-York.

THE ANATOMY OF MAN'S BODY.

As governed by the twelve constellation, according to ancient astrology.

The Head and Face, ♈ ARIES.

The Feet, ♓ PISCES.

To know where the sign is, first find the day of the month in the calendar page, and against the day in the tenth column, you have the sign or place of the moon; then find the sign here, and it will give you the part of the body it is supposed to govern.

DR. JOHN BULL'S
UNITED STATES ALMANAC
FOR THE YEAR OF OUR LORD
1856.

Prefatory Remarks by the Proprietor and Publisher.

In issuing this present number of my UNITED STATES ALMANAC for the year 1856 to the public, free of any charge, I feel constrained to give some explanatory reasons for so doing. The book is full of scientific, useful, and daily practical information alike to the Farmer, the Man of Science, the Merchant and the Mechanic, one and all can find some information in it, suited to each and every of the 365 days of the coming year, the eightieth year of our glorious Independence, 1856.

My object in distributing this Almanac to the "Millions," free of charge and at great cost to myself, is not merely to inform them of the day of the Month, Changes of the Moon, Moveable Feasts, and High Church days, but also to put them in possession of more important and philanthropic information of how they may obtain and use the most effectual and valuable medicinal remedies ever produced in the known world,—remedies which have saved many valuable lives and will doubtless under Providence save many more to future years of usefulness and joy to their families, themselves and the communities in which they may reside. All I ask then is that you read and ponder well the excellent virtues of these remedies, and if your neighbor has no such Almanac, get him one or lend him yours; not forgetting freely you have received, freely bestow.

Ever remaining the People's friend and devoted servant,

New-York, Sept. 1st, 1855.

JOHN BULL,
late of Louisville, Ky

The First Month, or JANUARY, 1856.

When Influenza, Asiatic Cholera, or any other epidemic prevails and poisons the air we breathe, take a wine-glass of Dr. JOHN BULL'S Sarsaparilla, morning and night, and you will be perfectly safe.

For the Cure of Headache or Toothache! there is nothing more certain than Dr. John Bull's KING OF PAIN.

THE GREAT KENTUCKY REMEDY!

DR. JOHN BULL'S SARSAPARILLA.

This medicine, when used according to directions, will cure, without fail, Scrofula or King's Evil, Cancers, Eruptions of the Skin, Erysipelas, Tumors, Chronic Sore Eyes, Ringworm or Tetter, Scald Head, Rheumatism, Pains in the Bones or Joints, Old Sores and Ulcers, Swelling of the Glands, Syphilis, Dyspepsia, Salt Rheum, Diseases of the Kidneys, Diseases arising from the use of Mercury, Loss of Appetite, Pain in the Side and Shoulders, General Debility, Lumbago, Coughs, Colds, Dropsy, Jaundice, Costiveness, Bronchitis, Weakness of the Chest, Sore Throat, Pulmonary Affections, and all other Diseases tending to produce Consumption, Liver Complaints, Female Irregularities and Complaints, Low Spirits, Sick and Nervous Headache, Night Sweats, Exposures, or Imprudence in Life, Chronic Constitutional Diseases; and as a Spring and Summer Drink, and General Tonic for the System, and a gentle and pleasant Purgative, it is superior to Blue Lick and Congress Water, Salts or Seidlitz Powders.

It is a remarkable fact that among the hundreds of eminent physicians who have examined the recipe by which Bull's Sarsaparilla is prepared, not one has condemned it, but all approved it, and commend it in the highest terms. Many physicians express themselves strongly in the belief that it is decidedly the best preparation of Sarsaparilla that has ever been placed before the public. Although there are many physicians who feel a reluctance to having their names appended to the recommendation of any particular remedy, notwithstanding they may approve of it in the highest degree, there are others who frankly yield their support in favor of a remedy which they know is capable of doing so much good in an afflicted community. As an evidence, read the following from old and respectable physicians, of high standing in the community in which they live:

TESTIMONY:

Testimony like the following renders superfluous all comments on the efficacy of Bull's Sarsaparilla. From Dr. L. P. Yandell, Professor of Chemistry in the Louisville Medical College:

I have looked over the list of ingredients composing John Bull's Compound Extract of Sarsaparilla, and have no hesitation in saying that they form a safe compound, and one that promises well in Chronic diseases to which it is applicable.

Louisville, June 6, 1848.

L. P. YANDELL, M. D.

What Dr. Pyles, Physician by appointment to the Louisville Marine Hospital, says of Bull's Sarsaparilla:

LOUISVILLE, March 20, 1849.

I have examined the prescription for the preparation of John Bull's Sarsaparilla, and I believe the combination to be an excellent one, and well calculated to produce an alterative impression on the system. I have used it both in public and private practice, and think it the best article of Sarsaparilla now in use.

M. PYLES, M. D.

Resident Physician of Louisville Marine Hospital.

LOUDBON, Ky., April 25th, 1850.

SIR,—Permit me to address to you a few lines.

I am a graduate of Transylvania Medical University: I have practised medicine in this wilderness country about five years, but owing to exposure to bitter cold weather, I have been indisposed with acute Rheumatism about six months. After having exhausted my skill in the treatment of my case, and derived no benefit, I was induced to give your Fluid Extract of Sarsaparilla a fair trial, and accordingly purchased a bottle of your medicine from your agent, Mr. George P. Brown, about two weeks ago, and I must confess that one bottle has entirely cured me.

It is my opinion that your preparation of Sarsaparilla is decidedly superior to any other preparation now in use, and I will take great pleasure in recommending it to the afflicted as being a remedial agent, and I will advise the physicians to use it in their practice, &c.

Respectfully yours,

B. B. ALLEN, M. D.

LOUISVILLE, July 13th, 1849.

I have examined the list of articles that compose John Bull's Extract of Sarsaparilla, and I have no hesitation in saying that it is a safe and valuable compound. I would prefer it to any article now in use, for the diseases arising from an impure state of the blood or taint of the system. I confidently recommend it to my friends as being a powerful Extract, and one that I believe will cure all classes of diseases for which it is recommended, if used according to directions. I believe it to be a valuable succedaneum to mercury. Nay, I have my doubts whether in the most violent and protracted cases of Syphilis, accompanied with Nodes Trophe, in caries of the bones, whether it ought not to succeed every other remedy.

S. R. McCONACHIE, M. D.

Honorary Member of the Medical Society, Philadelphia.

The 1st, 2d cloudy, snow; 3d coldest day; 4th—6th clear, cold; 7th, 8th snow; 9th, 10th cloudy; 11th—13th mostly clear; 14th, 15th changeable; 16th rain; 17th—20th clear, north west wind; 21st—23d rainy; 24th, 25th pleasant; 26th cloudy; 27th—29th pleasant.

One bottle of Dr. John Bull's King of Pain, has been known in hundreds of cases to cure the Asiatic Cholera in its most aggravated form by using it inwardly and outwardly according to the printed directions.

For Eruptions on the Skin, such as Blotches, Pimples, Freckles, Tan, Sun-burn, Scurvy, Salt Rheum or the like, use the great Blood Purifier, Dr. JOHN BULL'S SARSAPARILLA.

Such Testimony as this cannot be refuted!

Read the opinion of these

EMINENT DIVINES.

Rev E. W. Sehon,—Rev. E. Stevenson.

CONCLUSIVE.—The following is a verbatim copy of a certificate now in the possession of the proprietor of Bull's Sarsaparilla. Rev. E. W. Sehon is widely and generally known as an eloquent and accomplished pastor of the M. E. Church, and Rev. E. Stevenson has been known as one of the most talented and zealous members that the Kentucky Conference could boast of for many years, and at this time is filling the high and responsible station of agent for the M. E. Book Concern. Can the world produce better or more satisfactory testimony in favor of any medicine? Better testimony than was ever offered in favor of any medicine.—Rev. E. W. SEHON,—Rev. E. STEVENSON:

LOUISVILLE, May 20th, 1849.

We have used John Bull's Sarsaparilla, and have known it to be used with entire satisfaction; and we have no hesitation in stating our belief, that it is a safe and valuable medical compound, and calculated to produce much good and relieve much suffering; and therefore would cheerfully and most earnestly recommend it to the afflicted.

(Signed,)

E. W. SEHON,
E. STEVENSON.

We earnestly invite all persons who are suffering with any of "the ills that flesh is heir to," to call on Dr. John Bull's agent, and get a copy of Bull's Family Journal **GRATIS**; and for the sake of humanity, we hope that a single individual will not be found unwilling to give Bull's Sarsaparilla a trial, after reading, and recollecting at the same time, that it is impossible for the Doctor to publish the tenth part of the number of certificates of astounding cures performed by his Sarsaparilla. The amount of testimony voluntarily showered on Dr. Bull's Sarsaparilla, from well-known and distinguished individuals, both in public and private life, has been perfectly overwhelming.

Parents Read!

Mr. JOHN BULL.—Dear Sir: I take great pleasure in stating to you and the public that I have tested the value of Bull's Sarsaparilla. For about four years my oldest child has been greatly afflicted with something very similar to Scrofula, and was said by several physicians to be that disease. I used several remedies with but little or no effect, and I obtained a bottle of Bull's Sarsaparilla and it gave much relief. I have since used five or six bottles, and I am happy to say that she is about well, and the bottle she is now using, will, I believe, make a permanent cure.

Very respectfully,

J. N. WRIGHT,

General and Real Estate Agent, No. 76 Third-st., Louisville, Ky.

The following letter was handed us by Dr. John Bull. It is but one of the many letters that speak in like praise of his Sarsaparilla.—*Dem.*

BALTIMORE, Nov. 20th, 1850.

Dr. John Bull.—Dear Sir: Passing through your city, a short time since, I accidentally came across a number of your Family Journal. Previous to that, I was not aware of the existence of your compound. As a dernier resort, I determined to try the efficacy of medicine for severe chronic rheumatism, with which I have been suffering for some years past; and to my utter astonishment and delight, on my arrival here, I found myself greatly improved, having received more relief from your valuable compound, than any preparation I have ever yet tried. As you have no agency here, the first opportunity I have I will send for more. I give you this testimony of the great relief afforded me with the most sincere pleasure, and I feel sure a few more bottles will entirely restore me. I would advise you by all means to establish an agency in this place; it only requires that your invaluable preparation be generally known to be appreciated.

Truly yours,

SAMUEL NEWMAN.

RUSSELVILLE, Jan. 17, 1850.

Dr. John Bull,—I wish you to send me six dozen of your Sarsaparilla, as I have not more than thirty bottles on hand, and I think the quantity I now order will last me until March, when I will be in your city. Your Sarsaparilla is getting unbounded popularity in this section of the State, and your name is getting to be as familiar here as it is in Louisville. Please ship as before, as soon as you receive this.

Your friend,

W. A. LINEBAUGH.

The Third Month, or MARCH, 1856.

TO PROLONG LIFE and arrive at a vigorous and robust old age, we must keep pure the blood, for the blood is the constitution of man! if then the blood be impure, the constitution is weak and liable to become diseased, but if the blood be purified by using Dr. John Bull's Sarsaparilla, a sound and strong constitution will be our reward, free from all pain and not subject to disease.

MORE CONVINCING PROOFS

OF THE GREAT EFFICACY AND ALMOST MIRACULOUS CURATIVE POWERS OF

DR. JOHN BULL'S SARSAPARILLA.

SALTERSVILLE, HUDSON Co., New-Jersey, May 2d, 1855.

Dr. JOHN BULL,—DEAR SIR:—

I have recently been induced to try your Sarsaparilla, although I frankly confess that I considered my case was such that neither your Sarsaparilla or any other medicine could reach my disease. I have had, as I thought, as good medical advice as New-York could give, and the medicines that had heretofore helped me, failed to afford me any relief. I therefore concluded my stay on earth was quite short, and gave up all hopes of ever being able to be around my house again, and requested my husband never to lay out another shilling for medicine for me. I was so low and prostrated by fever and excruciating pains in my bones, that I could not turn in bed without shrieking, the agony I felt being so great; indeed, language cannot describe the misery I experienced.

Besides, at times, in addition to the above, I had the utmost difficulty in getting my breath. By the persuasion of my friends and my husband, I tried the "Kentucky Remedy," and the very first day I took it I experienced some relief, and before I had taken the first bottle the misery in my bones had left me, and before the second bottle was taken, the fever also left me entirely; and the difficulty I had in breathing, has been relieved in a most wonderful and surprising manner, and I attribute my present state of health, under Providence, to the medical virtues and efficacy of your Sarsaparilla.

I ought, perhaps, to state that, contrary to the expectation of myself, my husband, family, and friends, I am better in body than I have been for some months, and well enough to attend to the duties of my family, for which I feel I have cause for thankfulness.

MARGARET KEEGAN.

SALTERSVILLE, HUDSON Co., New Jersey, May 1st, 1855.

I hereby certify that I have been acquainted with Mrs. Margaret Keegan, wife of Mr. Thomas Keegan, whose certificate appears above, for about seven years; and do affirm, that the statements there made are true, and that not the slightest exaggeration in the case has been made. Both Mrs. Margaret Keegan and Mr. Thomas Keegan are reliable persons, and are so regarded and held by all who have any acquaintance with them here.

JOHN ELDERSON.

State of New-York, }
City and County of New-York, } ss.

Robert B. Kent, of the City of Brooklyn, County of Kings, and State of New-York, being duly sworn, says, that the foregoing certificate of Margaret Keegan is genuine, to deponent's knowledge. Deponent further says, that he knows John Elderson, and has known him for the past fifteen years, that said John Elderson is a person of good character, whose word is entitled to great weight, and who would not on any account state anything which was not correct.

R. B. KENT.

Sworn to before me, May 3d, 1855, }

S. H. STUART, City Judge. }

State of New-York, }
City and County of New-York, } ss.

I, Richard B. Connolly, Clerk of the City and County of New-York, and also Clerk of the Supreme Court for the said City and County, being a Court of Record, do hereby certify that Sidney H. Stuart, before whom the annexed deposition was taken, was, at the time of taking the same, City Judge for said City, duly elected and sworn, and that his signature thereto is genuine, as I verily believe.

In testimony whereof, I have hereunto set my hand, and affixed the seal of the said Court and County, the third day of May, 1855.

RICH'D B. CONNOLLY, Clerk.

GOUT—DR. JOHN BULL'S SARSAPARILLA

Is a certain cure for this painful malady; because it removes from the system those humors which are the cause not only of Gout and Rheumatism, but of every ache and pain we suffer. Two table-spoonfuls taken every night on going to bed, or if the pain is severe, night and morning, will in a short time make a perfect cure of the most violent attack, either of Rheumatism or Gout: at the same time the blood and other fluids will be so completely purified that pain of every description will be literally driven from the body.

MERCURIAL COMPLAINTS.

To all who are suffering from injudicious and excessive use of Mercury, with lameness, stiffness of the joints, pains in the bones and joints, cramps, mercurial rheumatism, &c., &c., we would recommend this potent remedy. It will thoroughly and effectually cleanse the system from the mercurial taint.

Life Preservers consist of boats, hollow-legged stools, strings of cork-wood, air-tight jackets and india-rubber bags, which are all very well in their way: but the **GRAND LIFE PROLONGER** is Doctor John Bull's Sarsaparilla. By using this **GREAT PURIFIER** we not only lengthen out the term of our existence, but we make life sweet by purging from the blood all that would cause pain, or create disease.

A THRILLING NARRATIVE!

Verified before **FERNANDO WOOD**, Mayor of the City of New-York,

Of most astounding facts, as related by a gentlemen now in the city of New-York, which occurred to him whilst on his late **JOURNEY TO SALT LAKE CITY**.

His providential escape from an untimely death shows the wonderful powers and efficacy of the remedy used in his recovery, and must inspire confidence to all sufferers, however low and wasted they may have become by disease or misfortune.

READ! PAUSE!! AND THINK!!!

DR. JOHN BULL.—Dear Sir: On or about the 1st of March, 1854, I arrived at Great Salt Lake in a complete state of exhaustion—almost a skeleton—and suffering from disease incidental to great exposure and abstinence from wholesome and proper food, contracted on the late winter Exploring Expedition of Col. Fremont in crossing the Rocky Mountains. My digestive organs were so weakened that no kind of food did me any good, and I was under the impression that my dissolution would soon follow.

My physician recommended your preparation of Sarsaparilla. I succeeded, after great trouble, in obtaining a few bottles, for which I think I paid three dollars per bottle. By using three bottles I found my general health re-established; and when I left Salt Lake City, on the 6th of May, I had gained forty pounds of flesh, and was in more robust health than I had ever been before. If this certificate of the benefit I derived from the use of your Sarsaparilla can be of any service to you, you can use it as you wish. I am, dear sir, respectfully, &c.,

S. NUNES CARVALHO,

New-York, April 18, 1855.

Corner of White-street and Broadway.

Sworn and subscribed to before me at the city of New-York, April 21st,

1855

Witness my hand and the seal of the Mayoralty.

FERNANDO WOOD, Mayor.

UNITED STATES OF AMERICA, STATE OF NEW-YORK, ss.

I, Richard B. Connolly, Clerk of the City and County of New-York, and also Clerk of the Supreme Court for said City and County, do hereby certify that Fernando Wood, Mayor of the city of New-York, before whom the foregoing deposition was taken, was at the time of taking the same the mayor of said city, and that his signature thereto annexed is genuine, and that the seal affixed is the official seal of the mayoralty.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court and county, the 21st day of April, 1855.

RICHARD B. CONNOLLY, Clerk.

DYSPEPSIA!!

The most distressing of all diseases, the most difficult to permanently cure, of any that afflicts society. A confirmed *Dyspeptic* is the doctor's dread plague—an ascetic in the social circle, and is a perfect burden to himself. Dyspepsia has caused more suicides than love, and committed more murders than jealousy! The dyspeptic is a poor, miserable being, and heretofore all efforts to restore him have proved ineffectual. He has been dosed with *Brandy Smashes*, or other powerful stimulants, until his "copper" is burned out, or he has been fed on low vegetable diet until his very knees knock together as he walks, from extreme weakness and lassitude. He has tried all the remedies of doctors, quacks, and old women. He has lived on *Graham bread*, until the mucous membrane of the alimentary canal is completely scoured out of him, and still the poor demented sufferer gets worse and worse! He can eat nothing but a little milk-porridge or water-gruel, and even that sours on his stomach, producing excruciating pains and eructations, and he is obliged to take soda, or some other alkali, to arrest acidity or water-brash.

Alkalies produce stone in the bladder or "gravel," and an awful diarrhœa, which soon reduces him to the necessity of laying down to die in this dreadful condition, filled with anguish and despair!

DR. BULL'S SARSAPARILLA, the greatest discovery of this discovering age, the great *Natural Remedy*—the medicine which is not a medicine, but a combination of pure Honduras and American Sarsaparilla, blended with Burdock, Yellow Dock, and Wild Cherry—was presented to him as a last hope. He, with the eagerness and energy of a drowning man catching at straws, placed it to its lips. Life or death hung upon the result. Nature, with Bull's Sarsaparilla as her assistant, triumphed! The first few doses corrected all acidity and strengthened his digestive organs, braced his nerves, giving full action to his torpid liver, and a few bottles cured him.

This pleasant-to-take preparation always assists dissolving the food, and sending its nutritious principles into the absorbents, regulating the biliary duct—promoting the secretions, thus giving vent to the excretions, stimulating the nerves, relieving costiveness, checking diarrhœa, and restoring perfect health to the hitherto incurable and confirmed dyspeptic.

TRY IT, YE MILLIONS OF SUFFERERS, AND BE CURED.

The Fifth Month, or MAY, 1856.

BULL'S SARSAPARILLA.—Go where you will, to steamboats bound for Nashville, New-Orleans, St. Louis, Cincinnati, Madison, Frankfort, or for the Green river country, and you will find immense supplies of this preparation being shipped on board.

But few merchants visit our city, in whatever Branch of trade soever they may be engaged, but have orders for more or less of Bull's Sarsaparilla.—*Louisville Democrat.*

To the Citizens of Louisville, of the entire Union, and everywhere else!

READ THE FOLLOWING TESTIMONY—THE TIME WILL NOT BE WHOLLY LOST!

LOUISVILLE, Ky., May 28th, 1853.
DR JOHN BULL.—*Dear Sir:* Being on a visit to Louisville, among my friends, I with much pleasure record my name among many others who have received permanent benefit from the use of your Sarsaparilla. I was a severely afflicted man for several years. My case baffled the skill of scientific physicians; indeed, I was given up to die by my friends, my system having been reduced from hundred and fifty down to seventy or eighty pounds weight. I was afflicted with Chronic Diarrhoea and Diabetes, and indeed a complication of diseases was in my system; one doctor even told me I had symptoms of Consumption. My case seemed more than a match for all medical advisers: it set at defiance the consultations and deliberations of the Old School doctors. Finding no relief from the regular practitioners, I tried your Sarsaparilla, and my physician hearing of it, told me to continue taking it, if I found it to do me any good; that temporary relief was all I could expect, as he could do nothing for me. I continued taking your compound, and to my astonishment I very soon experienced renovation and soundness of body. By the use of your Sarsaparilla, I have exchanged disease for health, pain for ease, sorrow for joy, and my life is being prolonged to a good old age. I attribute the preservation of my life and health to the use of your Sarsaparilla.

(Signed)

CAPT. JAMES S. HACKLY.

STATE OF KENTUCKY, JEFFERSON COUNTY.

This day, James S. Hackly came before the undersigned, Justice of the Peace for said county, and made oath that the foregoing statements are true as therein set forth.

Given under my hand, this 28th day of May, 1853.

JOSEPH CLEMENT, J. P. J. C.

LOUISVILLE, Ky., May 30th, 1853.

We, the undersigned, are well and personally acquainted with Capt. James S. Hackly, and do state that the above certificate bearing his name, was given by him to Dr. Bull; and, furthermore, we declare that Capt. Hackly is a gentleman whose standing and veracity is such that full and implicit confidence may be placed in his statements.

Respectfully submitted,

J. W. OWEN,

Of the firm of Owen & Schueing, Millers.

GEORGE GRIFFIN,

Clerk at the Louisville Democrat Office.

GEORGE A. OWEN,

Of the firm of Owen & Wood, Shoe Dealers.

RHEUMATISM.

Perspiration is one of the principal avenues by which the system rids itself of worn out particles of matter, after it has performed its proper functions in the different organs of the body. Sudden blasts of cold air when the body is heated, wet clothes or wet feet, working in damp cellars, or sleeping in damp rooms, obstruct the perspiration by contracting the surface of the skin, and throws this eliminated matter back into the circulation, which frequently produces this distressing disease. The muscles and tendons become contracted and stiffened, and the joints cannot be moved without great pain; and thus many persons suffer for months for the want of the proper remedy to expel this vitiated matter from the system. Bull's Sarsaparilla, to purify the blood, will perform these tasks to admiration.

RHEUMATISM CURED.

Let all who are suffering under the agonizing tortures of Rheumatism, read the following, and see what may be done for them, if they will use the infallible remedy.

UNIONTOWN, Ky., May 12, 1848.

Mr. John Bull—*Dear Sir:* For the last three years, I have been afflicted with Rheumatism of the severest character. I was at times in the greatest agony of pain, I tried every remedy I could procure for the disease, but found no permanent relief until I was induced to use your preparation of Sarsaparilla, which has entirely cured me of Rheumatism, and greatly improved my general health more than any medicine I ever used. I have been free of pain for several months, and have no doubt the cure is permanent, and I recommend it as the best medicine in use for rheumatism.

ISHAM BRIDGES.

It is useless to produce further testimony in favor of this great Remedy. It has only to be tried and proved to convince the public of its superior efficacy.

The rush of adventurers to California has in some measure subsided, but the rush for John Bull's Sarsaparilla is as great as ever. The Doctor says "the cry is still there come."—*Louisville Daily Democrat.*

Dr. John Bull's Sarsaparilla, "the

GREAT KENTUCKY REMEDY," makes bad blood pure and rich!
DR. JOHN BULL'S SARSAPARILLA cures Scrofula.

DR. JOHN BULL'S SARSAPARILLA heals old Sores.
DR. JOHN BULL'S SARSAPARILLA cures Piles.

THE GREAT KENTUCKY REMEDY.

MR. JOHN BULL'S SARSAPARILLA!

Will Wonders never cease?

If the following cures, performed alone by BULL'S SARSAPARILLA, are not wonders, then we acknowledge that we do not know the meaning of the word, Read, and be convinced that facts are stranger than fiction:—

LINE P. O., Fulton Co., Ky., Oct. 1, 1851.

Dr. John Bull—Dear Sir: The two dozen of your Sarsaparilla, ordered in September, came to hand, and, in acknowledging the receipt of the same, I feel I would be doing you injustice to withhold the following, among the many of the instances that have come under my observation, during the last two years, of the great curative properties of your Sarsaparilla.

Mrs. Jeanette Martin, a highly respectable lady of my neighborhood, aged sixty-five years, had been long afflicted with a cancerous ulcer, which finally reduced her to so helpless a condition that she could not leave her bed. She tried the best medical advice in our country, without relief, and had given up all hopes of a cure. At this stage of her case, I persuaded her son to take a bottle of your Sarsaparilla. He did so, and in a short time returned and purchased another bottle, stating the first had had a decidedly good effect. She continued to use it until, after the use of five or six bottles, I had the pleasure of seeing the old lady herself at church. She assured me that she had almost entirely recovered her health, and from her I received the account of her disease, and in about the same words I give it to you. This is but one of a number of cures under my observation—of very remarkable ones—performed by the use of your Sarsaparilla, in my neighborhood. The demand for it has steadily increased since its introduction here.

Very respectfully, your obedient servant,

WM. R. DICKINSON, P. M.

Rheumatism* of Twenty Years' Standing Cured.

Dr. JOHN BULL—Sir: I have been afflicted to a great extent for the last twenty years more or less, with rheumatic pains; a great portion of the time I was unable to get out of the house without the assistance of my cane, and I have been seriously afflicted with the Asthma. I have tried divers medicines but all to no effect. I have by the persuasion of my friends been induced to try a few bottles of your Sarsaparilla, and am happy to say to you that I am again walking around with much ease. The fact is, I am against quackery in all its particulars, and feel myself under obligations to let the public know that this Sarsaparilla is not ranked among that class, for I do assure you it has made me feel like another man, which all my neighbors know by my alteration. I am now on my third bottle and think I will not have to use it much longer to be entirely relieved. (Signed)

E. C. CARELAND.

Bryant'sville, Ia., June 26, 1849.

READ THE FOLLOWING.

LOUISVILLE, March 7, 1848.

Dr. JOHN BULL—Dear Sir: I must ever entertain the liveliest feelings of gratitude to you, for the incredible benefit and happy relief given me by your wonderful compound extract of Sarsaparilla. I do not write you this for publication, unless you may put it to such purpose; but write to you simply to express a feeling of kindness to you, with which my bosom will, until the day of my death, remain full. The afflicting rheumatism which beset me for years, which the simple followers of the healing art term chronic rheumatism, was a thousand times worse than any other disease. The neuralgic pains and general debility which ensued therefrom, compelled me to give up action, quit business, a pleasure and profit to me, and the mental pain arising from my bodily infirmity rendered me the most miserable of my Creator's handiwork.

The most learned of our physicians in my judgment, do not know the philosophy of this disease, but your preparation of Sarsaparilla, seemed to arrest my pains, and stop the ravages of disease immediately; it has made a cure in my case, and I believe in all cases, for nothing else could have relieved me; you should take great credit to yourself as the author of this medicine; for the appellation of quackery cannot apply to it; it answers the end for which it was given, and will effect a cure in rheumatism, at any stage of that disease.

I shall be pleased to serve you at any time, in any way, and can never stop thanking you for the benefit I have received at your hands, and I would go a journey of twenty miles to see one afflicted with Rheumatism as I was, to give him a bottle of your medicine, for I know it would give relief, and plant a rose instead of a thorn.

Ever yours, at command,

CHARLES W. SMITH.

Hear what Dr. Stapp, a physician who stands at the top of his profession, says of John Bull's Sarsaparilla:

I have been using John Bull's Sarsaparilla in a great variety of Chronic diseases with the most happy effects, and I have no hesitation in recommending it to the public for the cure of Scrofula, Syphilis, and all cutaneous and glandular diseases.

Yours, most fervently,

LEWISPORT, Ky., April 6, 1849.

WM. STAPP, M. D.

BULL'S SARSAPARILLA.

This renowned physic has been introduced into our community. A picture, a copy of which we have, represents the triumphal entry of Jno. Bull of Ky. into New-York, last summer. The scene is at Harlem Bridge, and the Bull has precipitated into the current beneath "good old Dr. Jacob Townsend" and Mr. Sands, while "young S. P." is hurled, with one of his fermented bottles bursting, high into the air. An exultant crowd, assembled on the bridge, bears testimony to the wonderful superiority and efficacy of Bull's Sarsaparilla.—*Vicksburg Sentinel.*

"He will forgive you, Father."

He stood leaning upon a broken gate in front of his miserable dwelling. His tattered hat was in his hands and the cool breeze lifted the matted locks which covered his noble brow. His countenance was bloated and disfigured, but in his eye there was an unwonted look—a mingled expression of sadness and regret. Perhaps he was listening to the melancholy voice of his patient wife as she soothed the sick babe on her bosom; or perchance he was gazing on the sweet face of his eldest daughter, as at the open window she plied her needle to obtain for her mother and the

poor children a sustenance. Poor Mary! for herself she cared not; young as she was, her spirit was crushed by poverty, unkindness and neglect. As the inebriate thus stood, his eyes wandered over the miserable habitation before him. The windows were broken and the doors hingeless, scarce a vestige of comfort remained; yet memory bore him back to the days of his youth, when it was the abode of peace and happiness. In infancy he saw again the old arm chair where sat his father with his bible upon his knee, and seemed to hear again the sweet tones of his mother as she laid her hand upon her darling boy, and prayed that God would bless him and preserve him from evil. Long years had passed away, yet tears came into the eyes of the drunkard at the recollection of his mother's love.

"Poor mother," he muttered, "it is well that thou art sleeping in the grave: it would break thy heart to know that thy son is a wretched and degraded being—a miserable outcast from society."

He turned slowly away. Deep within an adjoining forest was a dell where the beams of the sun scarce ever penetrated. Tall trees grew on either side, whose branches, meeting above, formed a canopy of leaves, where the birds built their nests and poured forth happy songs. Thither the drunkard bent his steps. It had been his favorite haunt in the days of his childhood, and as he threw himself upon the green sward, the recollections of past scenes came crowding over his mind. He covered his face with his hands, and the prayer of the prodigal burst from his lips, "Oh, God! receive a returning wanderer." Suddenly a soft arm was thrown around his neck, and a sweet voice murmured—"He will forgive you, father." Startling to his feet, the inebriate saw standing before him his youngest daughter, a child of six years.

"Why are you here, Anne?" he said, ashamed that the innocent child should have witnessed his grief. "I came to gather the lilies which grow upon the banks," she replied; "see, I have got my basket full, and now I am going to sell them."

"And what do you do with the money?" asked the father, as he turned his eyes to the basket, where, among the broad green leaves, the sweet lilies of the valley were peeping forth.

The child hesitated; she thought she had said too much; perhaps her father would demand the money, and spend it in the way in which all his earnings went.

"You are afraid to tell me, Anne," said her father kindly. "Well, I do not blame you. I have no right to my children's confidence."

The gentleness of tone touched the heart of the affectionate child. She threw her arms around his neck, and exclaimed, "Yes father, I will tell you. Mother buys medicine for poor little Willie. We have no other way to get it. Mother and Mary work all the time they can get to buy bread."

A pang shot through the inebriate's heart. "I have robbed them of the comforts of life," he exclaimed; "from this moment the liquor fire passes my lips no more."

Anne stood gazing at him in astonishment. She could scarce comprehend her father's words; but she saw that some change had taken place. She threw back her golden ringlets; raised her large blue eyes with an earnest look to his face—"Will you never drink any more rum?" she whispered timidly.

"Never!" dear Anne," replied her father solemnly. Joy danced in her eyes. "Then we will be happy. Oh, father, what a happy home ours will be!"

Years passed away. The words of little Anne, the drunkard's daughter, had proven true. The home of the reformed man, her father, was indeed a happy one. Plenty crowned his board, and health and joy beamed from the face of his wife and children—where once squalid misery alone could be traced. The pledge had raised him from his degradation, and restored him once more to peace and happiness.

LADIES, if you wish to look and feel well, and have a countenance and skin that shall be admired, then use JOHN BULL'S FLUID EXTRACT OF SARSAPARILLA.
PURE BLOOD, HEALTH, AND LONG LIFE is almost as certain to follow the use of this "Great Kentucky Remedy," as that the Sun rises or the Earth turns upon its axis.

A MOST REMARKABLE CASE!!

SCROFULA CURED

AND

EFFECTUALLY ERADICATED BY USING

DR. JOHN BULL'S SARSAPARILLA.

WE would most respectfully invite the attention of our readers to the statement of Thomas N. Ringo, headed "Important to the Public," in to-day's Tribune, who was cured of a most terrible disease by the use of Dr. Bull's Sarsaparilla. This must be a medicine of great value. The commendatory notices from various respectable sources must have the effect of convincing the most incredulous of its great power, in curing diseases having their origin in a depraved condition of the blood.—*Pittsburgh Evening Tribune*.

I, THOMAS A. RINGO, of Graves County, Ky., for the benefit of mankind generally, do hereby certify, that on or about the 16th day of October, 1847, I was attacked with a very severe pain in the lower part of the abdomen, which lasted but a few minutes, and moved into the left hip, and continued exceedingly painful for about five days, during which time I had a very light fever. At the end of that time the fever ceased, and the pain abated for a day or two, after which it again returned, and was much worse than before. During all this time I was under medical treatment. From a short time after I was taken, I was unable to walk or sit up; the hip in which the pain was so bad commenced rising, until some time in January, when it burst, and a number of pieces of bone came out—as many as twenty at least. Some of the pieces were three-fourths of an inch long. Some time after this, a hard knot appeared on the right hip, also one on my right wrist, and one on my leg below my knee. I continued to get weak and worse, and pain made its appearance in my right shoulder, and would move in my breast and stomach. At this time all persons gave me up to die. A physician then told me that, as a last remedy, I had better use MR. BULL'S FLUID EXTRACT OF SARSAPARILLA. After the use of the second bottle, the knot on my wrist commenced getting soft. I opened it, and a day or two after a piece of bone came out. My wrist soon got well, and I continued to gain strength. After I used the third bottle, I could get no more for some four weeks, after which time I succeeded in getting three more bottles. After using the three last bottles, the knot on my hip became soft; it was opened, and some corruption ran out, together with a small piece of bone, and the sore soon got well, and the knot entirely disappeared. The sore on my leg also opened, and a piece of bone came out. I continued the use of the Sarsaparilla until I used twelve bottles, and am now entirely well, and am able to do daily labor. It may seem strange to some, but I will here state that during the summer of 1849, I coughed up three pieces of bone, which can be seen at the residence of my uncle, Thomas Neal, where I now live; and if any persons doubt this statement, I will be happy to converse with them, if they will call on me.

(Signed)

THOMAS A. RINGO.

STATE OF KENTUCKY, GRAVES COUNTY, SET.

This day personally came before me the undersigned, an acting Justice of the Peace in and for said county, and made oath in due form of law, that the above statement is true. Subscribed and sworn to, this 15th day of February, 1850.

S. P. MORSE, J. P. for G. C.

I, Irwin Anderson, Clerk of the County Court of Graves County, State of Kentucky, do certify that S. P. Morse, whose name is signed to the above certificate, is now, and was at the time of signing the same, a Justice of the Peace in and for said Graves County, duly commissioned and qualified as such, and that faith and credit are due all his acts as such.

In testimony whereof, I have hereunto set my hand, and caused the seal of the County Court of said county to be hereunto affixed, this 15th day of February, 1850.

IRWIN ANDERSON.

Can the reader believe, after reading the descriptions of the above numerous cures, that there are still a few beings left suffering with disease, who refuse to give Bull's Sarsaparilla a trial? It is indeed hard to believe, but nevertheless it is too true. What kind of testimony would it take to convince the few remaining disbelievers, that Bull's medicine will do more even than it promises? The Doctor could produce another and another cure performed by his medicine; but if the cases published above will not convince the skeptical, it is useless to produce any more; and, indeed, it would cost a fortune, to publish the many certificates that have been showered on Dr. Bull. The largest mammoth sheet in America would not contain even the names of those cured, let alone full statements of their cases.

DR. JOHN BULL'S SARSAPARILLA cures Rheumatism.

DR. JOHN BULL'S SARSAPARILLA seems to be a perfect antidote for all diseases arising from impure blood, which is the seed of nine-tenths of all human suffering. It is particularly applicable to

FEMALE COMPLAINTS.

hence its great value to married as well as unmarried ladies; those who use it, from being pale and sickly, soon become robust, and have a fine color.

YET ANOTHER CASE!!

That must convince the most sceptical that
DR. JOHN BULL'S SARSAPARILLA
will cure Scrofula and fairly drive it
OUT OF THE SYSTEM.

IMPORTANT TO THE PUBLIC!

I would most earnestly solicit all persons to read the plain unvarnished statement made by Mr. Joseph Leathermann, of the most remarkable cure on record. This wonderful case was cured alone by the use of

DR. JOHN BULL'S SARSAPARILLA,

and the cure was produced by the blood being effectually purified. This one instance alone will establish the reputation of Bull's Sarsaparilla beyond competition, as the best purifier of the blood the world ever produced. The original certificate, with the Clerk of Jefferson county's official seal attached, can be seen at my office, No. 1 Fifth-street.

JOHN BULL.

JEFFERSONTOWN, JEFFERSON COUNTY, KY., February 25, 1850.

MR. JOHN BULL:—I cannot repress the joyous gratitude I feel in the recovery of my child, so long afflicted with one of the most distressing diseases that fallen nature is heir to. For six long years I have watched the ravages of the Scrofula in my child's constitution, and felt as a father feels for his suffering offspring. The disease at times attacking the eye until blindness succeeded, and at the same time emitting an acid water, that would blister the cheek, and after a time these blisters would become running sores, giving the intensest pain, and discharging quantities of this scalding water the same as that from the eyes, and beset with this kind of misery, the poor creature at times confined to the bed, and at others groping and feeling her way about the room, entirely blind.

She was treated by the best physicians I could get, both in the city and the county. Prescription after prescription, blister upon blister, setons, ointments, &c., she submitted to for six long years, and nothing could arrest the violence of the disease. I gave over all hopes of ever seeing my child but in the misery then upon her.

Prejudiced against patent medicines, I could not give my consent to listen to the swollen accounts of their advertisements, until, by accident, being at the house of my friend and neighbor, S. T. Miller, who had purchased some half-dozen bottles of your Compound Extract of Sarsaparilla, he handed me one of your Journals, and seeing the frequent and numberless certificates testifying to the high repute of your medicines, I was induced, but, I assure you, with little faith, to administer it to my daughter, and soon I saw she was benefited. I continued it, and am free to say to you and everybody, that it accomplished a complete cure; and the daughter of Mr. J. D. Hastings, of Shelbyville, who was similarly affected, has been relieved, and also another, the daughter of J. N. Wright, of Louisville.

This medicine will certainly cure Scrofula when in its worst form.

I send you this as a testimony of the success of your medicine in this disease, and although unable to account for the manner in which this medicine effects its cure, still I have seen with my own eyes the perfect cure made, and know it.

Respectfully,

JOSEPH LEATHERMANN.

P. S. If you think proper, you may publish this.

STATE OF KENTUCKY, JEFFERSON COUNTY, SCT.

Joseph Leathermann personally came before the undersigned, a Justice of the Peace in and for said county, and made oath to the truth of the foregoing statements, and I do further certify that the said Joseph Leathermann is personally known to me, and entitled to credit.

Given under my hand this 25th day of February, 1850.

J. W. EARICK, J. P. &c.

STATE OF KENTUCKY, JEFFERSON COUNTY, SCT.

I, Curran Pope, Clerk of the County Court of the county aforesaid, do certify that J. W. Earick, who has signed the foregoing certificate, is an acting Justice of the Peace in and for said county, duly commissioned and sworn, and that full faith and credit are due to his official acts

L. S.

In testimony whereof, I have hereunto set my hand and affixed my seal of office, this 25th day of February, 1850, and in the 58th year of the Commonwealth.

Conjectures of the Weather.

The 1st clear; 2d-5th cloudy, rain; 6th-10th changeable; 11th, 12th, cold; 13th, 14th mostly clear; 15th-18th changeable; 19th-21st pleasant; 22d cloudy, rain; 23d-25th clear and cold; 26th changeable; 27th-29th pleasant, moderate; 30th, 31st cloudy.

DRESSING WOUNDS.—Nine times out of ten, a wound will heal quicker if done up in its own blood, than any other way. As for a burn, whatever will entirely exclude the air the quickest, is best. Cotton will do this; so will oiled silk, if stuck down at the edge by any kind of sticking-salve. Put nothing on a burn to heal it. Nature will soon do that when the air is excluded, and the pain will almost immediately cease.

CATALOGUE OF DISEASE.

The following communication, giving an account of a remarkable cure occasioned by the use of Bull's Sarsaparilla, is from JAMES I. DOZIER, Esq., one of our oldest citizens. We were aware of the affliction of his daughter, and we cannot but regard her cure as the most striking of the many evidences afforded of the rare virtues of Bull's Sarsaparilla. — *Louisville Morning Courier*.

Louisville, May 15th, 1850.

W. N. HALDEMAN—*Sir*: More than three years ago, my daughter, Sally Ann Dozier, was attacked with Scrofula. Every means that promised to subdue the disease were resorted to and used by her, under the directions of the most learned physicians, without yielding even a prospect of success. The disease exhibited, externally, all its horrid ravages, and I lost all hope of any other than a fatal termination.

Several months ago, I saw an account of the wretched malady having been cured by the use of Dr. John Bull's Sarsaparilla. My daughter was anxious to try it, and I purchased two bottles of it. They were used as the labels on the bottles directed, and there was striking change for the better, for several weeks, when the amendment ceased to be progressive. I had noticed this with regret, and it occurred to me that I would change the *quantum*. I directed her to take three teaspoonsful, three times each day, for eighteen or twenty days, and then abandon its use entirely for eight or ten days. At the expiration of that time, resume its use by teaspoonsful, for the same time—and to give this mode of its administration a fair trial. She adopted my directions, and the effect proved *two things*—that the medicine would cure; and, that my mode of using it was proper. Nine bottles effected a complete, and, I am satisfied, a radical cure—she is well. The discolorations arising from the lacerations and burstings of the many frightful tumors, incident to the disease, are rapidly disappearing under the application, to the parts, of *fish brine*.

I have, sir, stated the facts just as they have occurred. There are many persons, among the first in the city, who know my daughter, and know how sad has been her condition for three years past. I write this for no reward, whatever—it is only written in the hope that it may be of benefit to others. It is right that I should say Dr. Bull knows nothing about it.

Yours, respectfully,

JAMES I. DOZIER.

LOUISVILLE, March 12, 1849.

Dr. John Bull—*My dear Sir*.—I would not think of writing this letter, and allowing you to give publicity to it, was I not morally certain of the contents, of its strict truth, and which has been demonstrated to me by experience incontrovertible.

From the use of the four bottles of your Compound Extract Fluid of Sarsaparilla, I have been healed and relieved of pain so torturous as to be indescribable, and I shall as long as I live, feel a cordial respect and the warmest gratitude to you, as benefactor to your race, by the introduction of this great balm to the afflicted.

For the last six or eight years my left leg has pained me constantly, but the pain was particularly excruciating in damp weather. The cause for its disease originated in my receiving upon the shin bone a very severe blow, which gave me great pain at the time, and which is nearly eight years since; this caused disease of some kind or other to fasten upon the limb, which continued to pass upwards to the hip joint and there seated itself. At times the fleshy parts of the leg would become callous and hard, and the pains arising from it being so excessive caused me to employ physician after physician, and from none could I get the least particle of relief. At last I was induced to take the Sarsaparilla, and in this I have found perfect relief, my limb now possesses its natural feeling, and for one I speak from practical experience. I know your medicine relieved me, and I advise every body who may have a chronic affliction of the limbs or body, not to delay the use of the medicine prepared by you, for it will relieve them certain and sure. It seems to make the cure by causing a reaction in the general system, producing general good health; first bringing about a healthy action of the stomach, and cleansing and purifying the blood.

I write you this and allow you to publish it, with a wish to do good alone, for I know "the healthy know not of their health, but only the sick," and when the latter shall take its advice, they will thank me for it.

Yours, respectfully,

JOSEPH YUCE,

Copper and Tinsmith, Sixth st.

Mr. Youce has been a citizen of Louisville for many years, and is well known to be a man of great truth. All who are disposed to be convinced of the wonderful virtues of Dr. John Bull's Sarsaparilla, can be satisfied by calling on him at his shop. Mr. Youce has said publicly that he would not be in the condition he was before the use of Dr. John Bull's Sarsaparilla, for thousands of dollars. Call and be convinced.

Conjectures of the Weather.

The 1st—4th pleasant; 5th—7th cloudy, rain; 8th—10th clear; 11th, 12th changeable; 13th—15th cloudy; 17th, 18th mostly clear; 19th thunder; 20th—22d cloudy, changeable; 22d—25th pleasant; 26th, 27th cloudy; 28th, 29th rain; 30th clear and pleasant.

FRESH AIR.—Every breath we draw, we take into the lungs from $1\frac{1}{2}$ to 2 pints of air; so that it requires about $2\frac{1}{2}$ gallons of pure air a minute, or 60 hogsheads every 24 hours, properly to supply the lungs. How important, then, to health, to have houses well ventilated, and not to sleep in small, close rooms!

CATALOGUE OF DISEASES.

After having the best medical advice and treatment, see what Bull's Sarsaparilla has done for Mr. Clyne's child.

NEW ALBANY, April 16, 1849.

This is to certify that my daughter Josephine, who is now seven years old, was afflicted from birth with swellings of the glands of the throat, and parts adjacent, which frequently broke out in running sores; and also with a very troublesome discharge from the ears, which continued for about five years or upwards, and although a great variety of prescriptions and medicines were made and used by physicians who were considered the most skilful in the profession, she found little or no relief, until after the use of John Bull's compound extract and fluid of Sarsaparilla one quart bottle, and part of another of which has effected a perfect cure. And I take much pleasure in recommending the use of said medicine to all who may be similarly afflicted.

Yours,

MICHAEL CLINE.

From Mr. S. A. Atchison, an old resident of Warren county, Kentucky, and a more truthful man does not live:

Dr. John Bull—Dear Sir—I have been using your valuable extract of Sarsaparilla in my family for more than a year, and have recently been induced to try its virtues in a case of scrofula of the most inveterate character. The subject is a negro woman some twenty-three years of age. The disease had been running on her some time, and she had been under the medical treatment of an eminent physician. When I commenced with your Sarsaparilla she was perfectly prostrated and diseased all over: she has taken but two bottles and I never have witnessed such a change in so short a time, and to all appearance she is rapidly recovering. When I commenced your treatment I did not believe she could live one week—she is rapidly regaining strength, and has a good appetite, and her skin has changed from an ashy deadness to a healthful character. I make this statement for the benefit of the afflicted alone, which you may use as you think proper.

Yours, respectfully,

S. A. ATCHISON.

BOYLE COUNTY, Ky., Oct. 6, 1851.

Dr. John Bull: Dear Sir—I have seen the most marvellous cure of one of my patients, by your valuable medicine—an old lady who had been afflicted from her childhood with scrofula and various diseases of the brain. She was sixty years old. It had run into something like leprosy, and she was the most frightful creature my eyes ever beheld. I called in Dr. McFadden, a very fine physician, to consult with me in relation to her. We came to the conclusion that it was out of our power to relieve her: but, on going to my office, I accidentally picked up one of your Journals, when,

on seeing the wonderful cures your Sarsaparilla had effected, I resolved to try the experiment in this case. I took her two bottles, after taking which I perceived a great change. I took her some more. She is now taking the sixth bottle, and I consider her entirely cured. I take great pleasure in recommending your Sarsaparilla to the afflicted public.

Yours respectfully,

JOHN M. ROSS, M. D.

SCROFULA CURED.

SHELBYVILLE, Ky, Jan. 1848.

Mr. John Bull—Sir—I cannot refrain from giving this testimonial of your compound concentrated extract of Sarsaparilla. My daughter was afflicted with scrofula of the severest character. It preyed upon her constantly, working out those dreadful effects naturally attendant upon this disease, until after ten years standing. It was at that stage I thought she must inevitably lose her sight, having during this time had her case treated by some of the most eminent physicians of the day, all of whom failed to succeed. I sought relief from those remedies offered to the public, as specified for this disease, failing alike of success. In this I was driven to despair. I saw no hope of my daughter's relief from the dreadful effects of this disease, save in a premature grave.

After having stated to you the nature of the case, you gave me a bottle of your Sarsaparilla, cited many cases of success, and insisted upon my administering it. To gratify you I took a bottle of it, and gave it as directed, but without hope of success. Contrary to my expectations it had an immediate effect. This determined me to persevere, and after using about twelve bottles, I succeeded in effecting a permanent cure, and my daughter is in better general health than she has been for ten years.

Yours, respectfully,

JNO. D. HASTINGS.

I deem it a duty I owe to the public to make these facts known, I therefore cheerfully certify to the above.

[Signed]

EURITH C. HASTINGS.

BETTER TESTIMONY

THAN WAS EVER OFFERED IN FAVOR OF ANY MEDICINE.

From Dr. JAMES M. MOORE.

DR. JOHN BULL—I have no hesitation in saying, that I believe your Sarsaparilla to be the best article ever manufactured, for the cure of Scrofula, Syphilis, and many other Cutaneous and Glandular Affections, having used it with entire success in a number of the above cases.

J. M. MOORE, M. D.

Conjectures of the Weather.

The 1st—3d pleasant; 4th, 5th snow; 6th—8th cloudy; 9th, 10th clear, cold; 11th, 12th changeable; 13th snow; 14th—17th clear, cold; 18th, 19th cloudy, snow; 20th—22d clear, cold; 23d, 24th moderate; 25th, 26th clear; 27—29th changeable; 30th cloudy; 31st snow.

SUDDEN CHANGES FROM COLD TO HEAT, from wet to dry, at this season will produce bilious attacks, languor, loss of appetite, nervous affections and general debility; then nature wants assistance, and the best remedy you can take is Dr JOHN BULL'S Sarsaparilla, the greatest spring and summer medicine in the world. Price \$1, or six bottles for \$5.

WEIGHTS OF DIFFERENT KINDS OF FIREWOOD.

Lbs. in a cord	Lbs. in a cord.	Lbs. in a cord.
1 Shellbark Hickory 4,469	6 White Beech 3,236	12 White Elm 2,592
2 Pignut, Hickory or } common Walnut } 4,241	7 Apple-tree 3,115	13 Spanish Oak 2,449
3 White Oak 3,821	8 Black Birch 3,115	14 Buttonwood 2,391
4 Scrub Oak 3,337	9 Black Oak 3,102	15 Pitch Pine 1,904
5 Red Oak 3,254	10 Yellow Oak 2,919	16 White Pine 1,868
	11 Maple 2,668	17 Lombardy Poplar 1,774

It is estimated that a cord of wood contains when green 1,443 lbs. of water. So that a farmer who brings into market a cord of green wood, has no less load for his team than another who should put on the top of his cord of dry white oak, three quarters of a cord of seasoned pine, or one hogshhead and two barrels of water.

Ear-ache, Insects in the Ear, &c.

Roast an Onion, and put it into the ear, as hot as it can be borne. Or, Take equal parts of *Sweet Oil* and *Laudanum*. Mix. Put 3 or 4 drops into the ear, and stop it up with cotton. Repeat this occasionally.

Insects frequently crawl into the ears of children, and also of adults when asleep. The best way to get rid of them, is to pour the ear full of *Sweet Oil*, or *Lard Oil*. This obliges the insect to come to the surface for air, when he may be easily picked out.

Hardened wax is easily removed by the repeated use of the *Syringe* and *ear-pick*. Warm *Castile Soap-suds* is the best solvent for this wax. When softened, it can easily be removed with the pick. But never use any violence.

Troublesome discharges from the ears, may be cured by injecting into the ear frequently, with a syringe, *Castile Soap-suds*, or a decoction of *White Oak Bark*.

Cure for Dyspepsia.

Take of *Hickory Ashes*, 1 Quart; common soot from the chimney, 6 Ounces; *boiling water*, 1 Gallon. Mix, and let them stand 24 hours, frequently stirring the ingredients. At the end of that time, pour off the clear liquor, and take a tea-cupful, morning and evening before eating, and a wine glass of Dr. John Bull's Sarsaparilla half an hour before dinner. The water must be poured off at the end of 24 hours, as by standing longer it becomes too caustic for use.

MAGNETIC TELEGRAPH.—On the 1st of January, 1850, there were in the United States, about 12,000 miles of the Magnetic Telegraph, working on Morse's system; and it is estimated about 10,000 miles, working according to the various other patents. In 1838, the American Institute reported as a wonderful thing, that Morse could telegraph the words "steamboat Caroline burnt," in six minutes! Now a thousand such words may be telegraphed in about two minutes!

Boils.

Take equal parts of *Ginger* and *Flour*; make this into a poultice, and lay it on the Boil. It will soon draw it to a head. Or, apply equal quantities of *soft soap* and *broken sugar*, well mixed. *Raw Carrots* grated, make an excellent poultice. If the above are found too painful, apply a *Bread and Milk poultice*, to which you have added a Table-spoonful of *Laudanum*. When the Boil gets ripe, make an incision into the head of it, large enough to let out the core. Poultice it for a day or two.

A GOOD RULE.

<p>"Tis well to walk with a cheerful heart, Wherever our fortunes call, With a friendly glance and an open hand, And a gentle word for all.</p>	<p>Since life is a thorny and difficult path, Where toil is the portion of man. We all should endeavor, while passing along, To make it as smooth as we can."</p>
---	---

Chilblains.

Wash the parts in strong *Alum Water* and Dr. John Bull's KING of PAIN mixed in equal proportions applied as hot as can be borne.

If the parts have been recently frozen or frost-bitten, the fire must not be approached, but the cold gradually abstracted. The affected parts may first be immersed in *snow*, or *cold water*, which will remove the frost; after which let brisk friction be used, and a little *Spirits of Camphor*, or *Volatile Liniment* be applied. If there is much pain or inflammation, apply an *Elm Bark* poultice.

Pure *Linen Stockings* worn through the winter, are said to be sure preventive of *Chilblains*.

CATALOGUE OF DISEASES.

MORE TESTIMONY FROM DR. MOORE.

DR. JOHN BULL,—“I am using your Sarsaparilla in several new cases of Scrofula, and with happy effect. I am now confident it is one of the most efficacious medicine that can be made for that disease.”

JAMES M. MOORE, M.D.
Winchester, Ky., Feb. 1, 1848.

ANOTHER WITNESS.

The following is an extract of a letter from a lady in this city who has been rescued, as it were, from an awful death by scrofula in its worst form, written to a friend in the country:

LOUISVILLE, July 10, 1848.

MY DEAR HARRIET:—I have been informed that you have given up to die, with, as you suppose, an incurable scrofulous disease. Why, do you not send immediately and get John Bull's Sarsaparilla? It will cure you most assuredly. Why I have been worse than you, and now I am restored to perfect health, by Bull's Extract of Sarsaparilla.

Dear Harriet, do not despair—while there is life there is hope. I will tell you honestly how I was afflicted for several years. My arm and ankles became much inflamed and swollen, and my whole system was affected with severe pain, and at times my feet and ankles were as large as two; I could not walk, at times, for several days. Some time after, my shoulders and neck became afflicted, and a large tumor or lump appeared on each side of my neck, much inflamed, also under each arm pit; those on my neck inflamed and finally broke inside of my throat, forming large and horrid ulcers; these also discharged acrid and offensive matter, which excoriated and eat the flesh from my throat and roof of my mouth, extending through my mouth into my nose, and two pieces of bones came off the roof of my mouth as big as your finger nail; these bones left a great hole that communicated with my nose. I could neither eat nor drink, without first filling this hole with lint. Neither could I speak intelligibly without the hole being stopped. At this time I thought I was the most afflicted creature on earth. My physicians and friends gave me up to die with this miserable disease.

I sent for Dr. W. H. Donne; he advised me to use Bull's Extract of Sarsaparilla, as he was well acquainted with its composition. Upon his order I purchased six bottles. In taking the third bottle I discovered a great change in my whole system; I found it was going to cure me. I continued to take it until I took the six bottles. I am now in perfect health—as much so as ever I was. My mouth and my throat are entirely well, the hole in the roof of my mouth, where the bones came out, is filled up with sound flesh, and I have no inconveniences in eating, drinking, or speaking, and wonderful to say, this Extract, John Bull's Sarsaparilla, alone, has performed the cure.

Dear Harriet, try this remedy, and if you come to town be sure and come and see me,

and I will show you those two bones that came out of the roof of my mouth.

Your friend, ANN SIMPSON.

I am knowing to the above case of Mrs. Ann Simpson and the statement in the above letter is strictly true. I have seen the bones and her when she was so ulcerated; her case was a most desperate one, and no doubt but Bull's Sarsaparilla alone, has performed the miraculous cure.

W. MARSHALL.

Louisville, July 12th, 1848.

For the facts relating to the case of Mrs. Simpson, the public are referred to W. H. Donne, M. D., late Demonstrator of Anatomy in the Louisville Medical College, and Professor of Surgery in the Memphis Medical College.

STILL MORE WONDERFUL.

Again we are reminded of the most wonderful cure that has come to the notice of the faculty by the use of Dr. John Bull's Sarsaparilla; and if after the following certificate there can be any doubts, let the reference be the physicians who pronounced the case incurable, but which has been so miraculously preserved by the use of this valuable medicine. Exaggeration forms no part of our disposition, nor does the public want any better testimony than the following from Capt. James Lee, of the Steamer Tennessee, who is an old steamboat commander, and well known for truth and integrity at Nashville and New-Orleans, and at all intermediate points on the Cumberland and Mississippi rivers.

NASHVILLE, Feb. 13, 1851.

MR. W. EVANS, agent for the sale of John Bull's Sarsaparilla at Nashville, Tennessee—Dear Sir:—My son, a boy of about twelve years of age, has been afflicted with the Scrofula about eight years, affecting his eyes so that he could not see for weeks at a time, and in fact nearly blind, his right leg perishing away, losing many of the ankle bones—the hip joint protruding through the skin. He could not walk except upon crutches, and for the last several years I have had him under the treatment of the best doctors of New-Orleans, Louisville and Nashville but all without avail; and I must say that I had given him up to die, and that very soon, and the boy himself had lost all hope of recovery. At length I was urged to try Dr. John Bull's Extract of Sarsaparilla, although with little hope of any benefit being derived from its use; but after the use of eight bottles, to my great joy and satisfaction found his sight was perfectly restored, his leg healed, but is considerably bent and weak, and I think with the use of a few bottles he will be perfectly restored. His appetite is good, looks well, and is very cheerful; plays ball with his playmates, rides his poney, and is much delighted with the happy prospect of getting well, after having wholly despaired of ever getting well before he commenced the use of this valuable medicine. And I cheerfully recommend it to the afflicted, as I feel it my duty to do so.

JAMES LEE, Steamer Tennessee.

CATALOGUE OF DISEASE.

PILES! PILES!!

The cause of this troublesome, unpleasant disease always arises from impure blood, indigestion, &c. To cure any disease you must first remove the original cause that produces it. Bull's Sarsaparilla not only purifies the blood, but it will make new blood. This may appear strange but nevertheless it is true. Mr. Bull has made a discovery, which is no less than the power of medicine to produce blood, on the same principle that healthy food will produce flesh. His Sarsaparilla creates new, pure, and rich blood, consequently invigorates the system. It is a great blessing to the weak and debilitated.

A gentleman of high standing thus writes—
 "I have been distressed for four years with the piles; my sufferings have been intense, and my physician had recommended an operation as the only means of relief. Bull's Sarsaparilla was advised, and I have used one bottle, and so far as I can judge am fully and entirely cured. I cannot refrain from expressing my anxiety to have its qualities more extensively known. Please send me six bottles as there is none in this city. ****.

Vicksburg, Miss., Sept. 9, 1848.

From the Lincoln Journal, Fayetteville, Tenn.
WONDERFUL AND ASTONISHING CURE.

Read and be convinced of the wonders that can be performed by the use of that truly great and extraordinary medical compound

DR. JOHN BULL'S SARSAPARILLA. MORE TESTIMONY.

We ask attention to the following certificate of E. E. Dismukes, testifying to the curative effects of Bull's Sarsaparilla. Mr. Dismukes is well known in this community as a highly respectable and worthy citizen, whose veracity will not be questioned by those who know him.

"This is to certify, that I have been afflicted with the PILES, and have tried every Patent medicine that I have seen recommended for the cure of this disease; and have also consulted several Physicians, and tried their remedies without obtaining any permanent relief. Some time in February last I saw Bull's Sarsaparilla advertised in the Lincoln Journal, and determined as a last resort to try it, I immediately procured of Webb & Smith the Agents at Fayetteville, Tenn., a half dozen bottles and resolved to give it a fair trial, and I am happy to say that after using one bottle I was entirely relieved of the disease; it is now two months since I commenced using this medicine and I have no symptoms of its return. I have also been afflicted with chills for the last two years, but since I commenced using the Sarsaparilla I have not had a chill, and my general health is very much improved. Having been so much benefited by this valuable medicine I feel it a duty I owe to the afflicted and the proprietor, to make public the beneficial effects I have derived from it use.

E. E. DISMUKES.

Lincoln Co. Tenn., Apl. 25, 1850.

Fort Desmoins, Iowa, Apl. 10, '51.

DR. JOHN BULL.—*Dear Sir.*—During the past winter, my wife was afflicted very severely with the Yellow Jaundice; and after following the prescriptions of physicians for several weeks, without any beneficial result, she commenced taking your Sarsaparilla; and on taking one bottle, the skin assumed its natural color, and by the time she had taken two bottles she was entirely well.

Yours truly,

L. D. WINCHESTER.

ERUPTION ON THE FACE.

A BAD CASE CURED.

DR. JOHN BULL.—*Dear Sir.*—I take pleasure in recommending your Sarsaparilla to the public, for I can do so without the least scruple of conscience, especially for the disease with which I was afflicted. I had a breaking out on my face, which persons call the "Barber's Itch," for a number of years; and at times a solid scab would form on my chin and face. I tried a great number of remedies, but failed to obtain relief, until I tried your Sarsaparilla. The use of two bottles has effected an entire cure. I therefore recommend it to all similarly afflicted.

FRANCIS OTTOWELL.

Louisville, March, 1848.

FRANKLIN Co., Sept. 15, 1849.

MR. JOHN BULL.—I have been afflicted with what the physicians call dyspepsia, for about three years, I have consulted with and followed the prescriptions of some of the most eminent doctors in the country. But alas! none of them could do me any good. For six or eight months my bowels were either very costive, or very loose, I was much afflicted with alternate diarrhoea and costiveness, the former producing intense griping, sickening pains in the region of the umbilicus and lower bowels. The latter producing pains in the head, giddiness, and dimness of sight. Thus I suffered more than I thought man could suffer and live; and what was worse, there was no one to sympathize with me, though I was wasted until I was a mere skeleton, being nothing but skin and bones. The doctors would tauntingly say "he has only got the belly ache, he will get well after a while."

Thus, when I was hardly able to stand alone, when I only weighed ninety pounds, I was persuaded, ah! persuaded, for I had tried every thing else in vain, to try your compound extract of Sarsaparilla. The first bottle stopped the diarrhoea, producing gentle, and as I think, healthy evacuations of the bowels, I have been using the extract for six weeks; I have gained some sixteen or twenty pounds of flesh, my color is somewhat improved, and I think I am getting well, and shall continue the use of your truly valuable medicine.

I am, sir, respectfully yours,

LUTHER R. SULLIVAN.

CATALOGUE OF DISEASES.

THE LETTER.

INTERESTING TO THE LADIES.

The following beautiful and highly flattering letter, addressed to Dr. Bull, is from the pen of the accomplished lady of Dr. JOHN T. COOKE, one of the oldest and most eminent physicians in the State of Indiana. Any one who is curious enough, can see the original by application to the Doctor's office, 81 Fourth-st. MOUNT VERNON, Dec. 15, 1849.

DR. JOHN BULL—SIR: Permit me to say to you, for the benefit of the afflicted female community, that about twelve years ago I took a chronic disease of the stomach and digestive organs, and a general debility and derangement of the whole system.—My liver and bowels were in so torpid a state that it was, at all times, with the utmost difficulty that I could get any medicine to act on my bowels, and most generally I had to resort to the most drastic cathartics, which would leave me in a delicate state. I was not often confined to my bed; but my health was always bad; I was very much troubled with the sick head-ache and costiveness, and could not take animal food for five or six years without its producing bad effects; I have had constant cold feet during that time, and was very much troubled with distressing and violent attacks of cramp. I have also had, for the last five or six years, a distressing cutaneous eruption, from which I never could get any permanent relief, and no female has ever suffered more from Prolapsus Uteri and Fluor Albus than I have, together with the Piles. I have been under the treatment of several physicians for the above diseases, without any permanent relief.—In April last I was persuaded to try S. P. Townsend's Sarsaparilla: I took five bottles of it without the least apparent relief, and took no other medicine for six weeks, when my health became much worse. I was then prevailed upon to try your Compound Extract of Sarsaparilla: with much reluctance I consented to try it, and on taking the first dose I discovered it to be much stronger than any other I had been taking; I could feel a warmth through my whole system, and before I had finished the first bottle I found myself improving in all my complaints; I have taken five bottles of it, and have not had a single paroxysm of cramp or cold feet since I commenced taking it. I eat animal food without any inconvenience; my appetite is remarkably good, my bowels perfectly regular, and my digestive organs have as good tone as ever they had. I am not troubled with head-ache or sick stomach as formerly; my entire health is better than it has been for ten years, and I am well satisfied it has been entirely accomplished by taking your Compound Extract of Sarsaparilla. I esteem it as one of the most valuable medicines ever invented for all chronic diseases to which it is applicable, if taken according to your directions, and continued a sufficient length of time to have the desired effect on the system.

ANN L. COOKE.

AS A FEMALE MEDICINE

IT IS

WITHOUT A RIVAL!

This Sarsaparilla is a sovereign and speedy cure for incipient consumption, barrenness, prolapsus uteri, or falling of the womb, costiveness, piles, leucorrhoea, or whites, obstructed or difficult menstruation, incontinence of urine, or involuntary discharge thereof, and for the general prostration of the system, no matter whether the result of inherent cause or causes produced by irregularity, illness, or accident. Nothing can be more surprising than its invigorating effects on the human frame. Persons of all weakness and lassitude, from taking it once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the cause of barrenness. It will not be expected of us in cases of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with fine and healthy offspring. It has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period, "*the turn of life*," should neglect to take it, as it is a certain preventative for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed for several years by using this medicine. Nor is it less valuable for those who are approaching womanhood, as it is calculated to assist nature by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the delicate diseases, to which women are subject.

It is the safest and most effectual medicine for purifying the system, and relieving the sufferings attendant upon child-birth ever discovered. It strengthens both the mother and child, and prevents pain and disease, increases and enriches the food; those who have used it, think it indispensable. It is highly useful both before and after confinement, as it prevents diseases attendant upon child-birth. In costiveness, piles, cramps, swelling of the feet, despondency, heartburns, vomitings, pain in the back and loins, false pains, hæmorrhage, and in regulating the secretions, and equalizing the circulation, it has no equal. The great beauty of this medicine is, it is always safe, and the most delicate use it most successfully.

As a beautifying agent, it is far superior to all cosmetics and lotions in use, producing a clear and beautiful skin, rosy cheeks, removing freckles and pimples. A hint to the young ladies is sufficient.

A Voice from Columbus. LIVER COMPLAINT.

This is a very popular and rather fashionable disease in the western country, with doctors as well as patients. If a person afflicted with lassitude, fullness and pain in the right side, occasional nausea, difficulty in breathing, a dry cough, loss of appetite and flesh, sallow complexion, costiveness, and indigestion—all symptoms of derangement in the circulation of the blood, engorgement of the portal circle, and consequent obstruction of the biliary ducts, (being the first indications of a bilious attack,) the conclusion is, that he has the "Liver Complaint." Thousands have their health and lives sacrificed yearly, by taking prescriptions from the doctors, for that disease, drawn out in secret language and horse doses, disguised by hieroglyphic characters, which contain large quantities of calomel and blue mass, when they know in their very conscience, (if perchance they have any left) that the result will be made of more injury than relief to the patient. By being dosed with such poisonous drugs the system is prostrated, (more so at this time of the year than any other,) the poor patient salivated, his limbs and glands sore and swollen, and in the attempt of removing one disease, ten spring up in its place.

It is astonishing that people will be so credulous as to allow themselves to be ruined by this tearing down treatment, when a few bottles of Dr. Bull's Fluid Extract of Sarsaparilla, so pleasant to take, would, by its action upon the liver and blood vessels, have saved all their suffering, with salivated and toothless jaws, and perhaps life itself, and a long doctor's bill in the bargain.

This invaluable preparation is daily grappling with disease, and is performing the most wonderful cures ever known. No system under its influence, can be attacked with the cholera, or any form of disease, as has been fully established by the sale of over 1200 bottles in this city, within the past few months.

ANOTHER CASE!!! SCROFULA CURED.

HENDERSON, October 18th, 1853.

DR. JOHN BULL.—Dear Sir: I have been afflicted for a number of years with a Scrofulous affection of the head and neck. I have consulted the most eminent physicians in our place in regard to the matter, but could get no relief. I was induced by a friend of mine, Dr. Thomas Johnson, who has tested your medicine, and is a strong believer in it, but owing to his deep-rooted prejudices against all patent medicines, has failed to give publicity to his experience in regard to the efficacy of yours—to try your Sarsaparilla. I procured a bottle of it, and used it with the happiest effect, and have continued its use to this day. I am now almost entirely relieved. I would recommend it in all cases of a similar nature. You may make what disposition you please of this certificate. If you think you can accomplish any

good by its publication, you are at liberty to make it. Respectfully,

SAMUEL STILES.

OCTOBER 19th, 1853.

I cheerfully endorse the above statement.

THOMAS L. JOHNSON, M. D.

CONSUMPTION.

The chilling conviction of the incurable nature of this disease has checked the ardor of investigation, which, upon other occasions, has excited the exertions of the most learned and ingenious medical writers of the present age. Acting under the influence of this persuasion, the medical world have for centuries past made little or no progress in ascertaining the most rational and effective mode of curing it.

In the bills of mortality in the city of London, in 1845, three thousand and nine hundred and ninety-six persons are stated to have fallen victims to Consumption. This appalling list shows too plainly that the usual treatment is greatly defective, and it becomes the duty of the physician as well as the patient to try other remedies, especially when one can be obtained so truly safe and efficacious as Bull's Compound Extract of Sarsaparilla.

The reputation of this medicine is now so well established that liberal minded men in the medical profession, both in this and other cities, recommend it to their patients as the best of all remedies for pulmonary complaints and physical debility; and it is generally received as one of the standard medicines of the day. It has also been introduced into the practice of many of our best infirmaries and other institutions, and has long since received the public sanction of most eminent chemists and professional men.

John Bull's Compound Fluid Extract, of Sarsaparilla is prepared under the immediate supervision of the proprietor, and is warranted to be uniform in strength and medical virtues, and to keep in any climate, and any length of time; and for facts concerning many of the wonderful cures performed by this truly valuable and matchless vegetable compound, the sceptical are referred to the many certificates in the hands of the agents.

ERYSIPELAS, DIZZINESS.

LOUISVILLE, January 13, 1848.

That is to certify that I was afflicted some time since with Erysipelas in my leg and Dizziness of the head to an alarming extent. Several physicians told me that I would lose my leg, and perhaps my life, if it was not checked. I tried several remedies as cures, but the disease continued to grow worse, until I was advised to use Dr. John Bull's compound fluid extract of Sarsaparilla, which acted like a charm. Two bottles have made a perfect cure, and my health is better than it has been for years. I consider it the best medicine in the world for the cure of all chronic diseases.

CHAUNCY BACON,

[35] Compositor at the Democrat Office

OPINIONS OF THE PRESS.

JOHN BULL'S SARSAPARILLA.—This valuable medicine is gaining public favor with astonishing rapidity; and its unprecedented and unrivalled popularity is not without merit. It has only to be fairly tested, to give it the preference over all other Sarsaparillas. As a purifier of the blood, it excels all other medicines: and the numerous certificates which have been voluntarily tendered to Dr. Bull, from the most eminent physicians, as well as gentlemen of every class and profession, of high reputation, and who are well known to all by character, if not personally, is proof conclusive, beyond a reasonable doubt, that it has effected thousands of almost miraculous cures, in all the various diseases and forms of disease and human suffering for which it is recommended. The physicians of our place recommend its use (we believe almost without an exception), in preference to all other compounds purporting to be Sarsaparilla. It has been but a few months since it was first introduced here, and we are informed by those who keep it for sale, that it is more in demand than all other preparations of the kind. We have tested its merits ourself, personally and in our family, and confidently and cheerfully recommend its use to the afflicted. We say to all, give it a fair trial, and be convinced of its efficacy.—*Charlestown Mirror*.

By reference to our advertising columns, our readers will discover an advertisement of Bull's Sarsaparilla. We will say for ourselves, that it is a good medicine, for we have tried it; and we have no doubt we could obtain a score of people in our village, who would testify to the same fact.—*Washington Democrat*.

BULL'S SARSAPARILLA.—We refer the attention of our readers to the lengthy advertisement of John Bull, in another column. This preparation of Sarsaparilla is fast winning its way into universal use, not only among the citizens of our city and State, but throughout the South and West generally. It is recommended by eminent physicians, and must doubtless yield a splendid fortune to the proprietor.—*Democrat*.

BULL'S FLUID EXTRACT OF SARSAPARILLA.—We see that our friend Reynolds has received a fresh supply of this valuable medicine. We are well acquainted with Mr. Bull, seen him manufacture the medicine, and have used it in our family, and can therefore state that it does not come under the head of "patent nostrums," which are usually palmed off upon the public. It is what it is represented.—*Memphis Evening Herald*.

BULL'S SARSAPARILLA is doing more good in this neighborhood than any medicine of a similar character has accomplished. Many of our acquaintances who have been using it, declare that the good effect it has upon them is so great, that no reasonable sum of money would be an inducement to relinquish its use. We have the genuine article for sale at this office. It is also for sale by Murphy & Robertson, Crabb & Ewing, and Dr. Grant.—*Jackson County (Ia.) Advocate*.

THE GREATEST MEDICINE OF THE AGE IS BULL'S SARSAPARILLA.—We believe this medicine to be superior to any Sarsaparilla in the country. We know many who have used it successfully, and some who have been afflicted for years have been relieved, and are now in good health. As the public is convinced of its virtues, it is sought for, and Mr. Bull is receiving orders from all parts of the country.—*Louisville Democrat*.

BULL'S SARSAPARILLA.—It will be seen by referring to our advertisements, that this most excellent curative is still gaining ground in the estimation of the public. Not a day passes, but brings in fresh testimonials of its triumphs over disease. It is very palatable, and seems more like an agreeable and refreshing beverage, than a highly medicated and potent restorative.—*Louisville Journal of Commerce*.

BULL'S SARSAPARILLA.—We have frequently noticed Townsend's Sarsaparilla, but we are confident that BULL'S is not less deserving of commendation. Its effects in hundreds of cases in this city, prove it to be an invaluable medicine. Very many persons consider themselves wholly indebted to it for the health they enjoy. In numerous complaints, it is undoubtedly the best remedy that can be employed. This medicine is kept constantly on hand by J. B. Wilder & Co.—*Louisville Journal*.

BULL'S SARSAPARILLA.—We refer our readers to the notice of this universally popular medicine, found in our columns of to-day. Its virtue having afforded, to all those who have sought it as a curative agent, such universal relief from almost every disease to which the human system is heir to, is creating a demand for the article, having scarcely a parallel in the history of patent nostrums. To the sick and afflicted, the great remedy is, BULL!—*White River (Ia.) Standard*.

WE copy the following from the *Cincinnati Dispatch*:—Every word said by it, as well as by our neighbors, in regard to Bull's Sarsaparilla, is strictly true. Orders for it are coming in from every State and Territory, by every mail, and such is the rapidly increasing demand for it, that although he has a strong force engaged in its preparation night and day, yet he cannot supply it as rapidly as it is required. One of the best recommendations of Bull's Sarsaparilla, is the fact, that where it is best known it is most highly prized.—*Louisville Courier*.

OPINIONS OF THE PRESS!

READ! READ!! READ!!!

The truly wonderful and remarkable cures that have come under our immediate observation, have more than convinced us that Doctor Bull is a GREAT MAN, and that his Fluid Extract of Sarsaparilla is the most valuable combination of vegetable extracts that the science of chemistry has ever produced. All success to the Doctor, in his new enterprise, say we.—*Louisville Courier.*

We agree with our neighbor of the Courier, that Doctor Bull is a GREAT MAN, and that his Sarsaparilla is a GREATER MEDICINE; and we are fully convinced that the Doctor, with his Sarsaparilla, will create a far more enthusiastic excitement East, than Barnum did with Jenny Lind. We would not have our readers to understand us as classing the Doctor and his Sarsaparilla with Barnum and Jenny Lind, because all who spend their dollar for a bottle of Bull's Sarsaparilla will get its equivalent; and we have heard it slyly hinted, that many after hearing the divine Jenny, and finding their pockets minus from ten to twenty dollars, thought it was paying pretty dear for the whistle. One objection we have to Bull's Sarsaparilla, and only one—it is so exceedingly pleasant to the taste, and invigorating to the system, that, once in the habit of using it, it is equal to smoking fine regalias, chewing Langhorne's best, or drinking Walker's mint juleps—you can't quit it.—*Louisville Democrat.*

The above complimentary notices from the editors of the Louisville Courier and Democrat, were endorsed by Geo. D. Prentice, Esq., the distinguished editor of the Louisville Journal, in the following flattering notice:

There is no doubt in the world of the greatness of Doctor Bull, and the excellence of his Sarsaparilla. Some of the most scientific physicians in this city have applauded the Sarsaparilla: and what is a great deal better, the million applaud it too. It is having a tremendous sale. The celebrated Jayne has, from the profits of his medicine, built a granite palace in Philadelphia, seven stories high, and Dr. Bull, if he chooses, can very soon build one twice as high as that. It is, we are told, very difficult for him to walk through our streets at all; as he finds himself arrested at every step, by grateful men and women, many of whom have travelled from great distances to look upon their benefactor, and to bless him for their wonderful restoration to health. The Doctor, with all his extraordinary merit, is very modest and retiring; yet, we trust that the Eastern cities will, in justice to themselves, give a fitting reception to the distinguished man who has made as glorious a campaign against human diseases as Gen. Scott made against the Mexicans.

DR. BULL'S SARSAPARILLA!

We publish the notice of this valuable medicine. We but seldom call attention to the medicines which we so frequently and generally publish in our paper, but this forms an exception. The list of articles which compose this Extract of Sarsaparilla, have been fully and freely submitted to the examination of the physicians of our country; and many of the most eminent and successful practitioners of medicine have decided in its favor—highly recommend it and use it themselves. Perhaps no medicine, in the same length of time, has become so universally popular. We, therefore, feel perfectly safe in calling attention to this very valuable medicine which is manufactured and sold by Dr. John Bull, of Louisville.—*Nashville Christian Advocate.*

BULL'S SARSAPARILLA.—This is truly a valuable medicine, and worthy the high reputation it has acquired. We took a cold a few weeks since, which threatened serious consequences, if not arrested. A cold upon the lungs, producing a severe cough and a violent pain in the chest, is alarming indeed. We neglected doing any thing for it until we were completely prostrate. We purchased a bottle of the Sarsaparilla, and used it three or four days, and were greatly relieved. We believe this medicine to be an excellent remedy, and can safely recommend it to those afflicted with incipient consumption.—*Iroquois Journal, (Ill.)*

Ye who are basking in the sunshine of health and happiness, be advised! Ye who are strong and rugged, and who, through your own prejudice, or that of your medical adviser, laugh to scorn remedies brought to the relief of suffering humanity, beware!

"Bull's Fluid Extract of Sarsaparilla" is no secret medicine!—no humbug! It has done too much for the afflicted to be so denounced! To repair the shattered bark of life, torn and tattered by disease in all its parts, and to put it again upon the great ocean of society, with its sails unfurled to the winds of heaven, is something. To enter the sick man's chamber, with death knocking at his door, while life is in its evening tide, and to light up, with the rays of hope, his feeble health, and bid him live—this, too, is something. Those in health, and who wish to continue so, use "Bull's Sarsaparilla" every morning and evening. It acts specifically upon the liver, the blood, and digestive organs. The proof of its efficacy is before you. Not a single man, woman, or child, has died of cholera, or any of its symptoms, who used this invaluable preparation. Look at the city of Louisville, where this Sarsaparilla is made, and where one hundred and fifty to two hundred bottles are retailed daily; but few isolated cases of cholera have occurred, and they were either from the boats, or who disregarded our advice.—*Cincinnati Chronicle.*

THE CAPITOL AT WASHINGTON,

represented in the above engraving, is a large and showy building, of the Corinthian order of architecture, of freestone, and painted white. It is situated in the centre of a square, on an eminence 78 feet above tide-water; and consists of a central edifice and two wings, the entire length being 352 feet, and the depth of the wings 121 feet. On the east front, there is a splendid portico of 22 columns, 38 feet high; and on the west front, a portico of 10 columns. The height of the building, to the top of the dome, is 120 feet; and under the dome, is the rotunda, 95 feet in diameter, and of the same height, adorned with sculpture and paintings of a national character. On the east front, in niches, are colossal figures, in marble, of Peace and War, and a fine marble statue of Columbus at the entrance. The colossal statue of Washington, by Greenough, stands in the east park, in a neat temple erected for the purpose. Within the building, are the hall of the House of Representatives, the Senate chamber, the library of Congress, the court-room of the Supreme court, and some 70 rooms for the accommodation of committees, &c., &c. Around the capitol, are 22 acres of park, highly ornamented with trees, shrubbery, fountains, &c.

GOVERNMENT OF THE UNITED STATES.—The seventeenth Presidential term of four years began on the 4th of March, 1853, and will expire on the third of March, 1857.

FRANKLIN PIERCE	New Hampshire	President	Salary \$25,000
DAVID R. ATCHISON	Missouri	Vice-President, <i>pro temp.</i>	8,000
WILLIAM L. MARCY	New-York	Secretary of State	8,000
JAMES GUTHRIE	Kentucky	Secretary of the Treasury	8,000
JEFFERSON DAVIS	Mississippi	Secretary of War	8,000
JAMES C. DOBBIN	North Carolina	Secretary of the Navy	8,000
ROBERT MCLELLAND	Michigan	Secretary of the Interior	8,000
JAMES CAMPBELL	Pennsylvania	Postmaster-General	8,000
CALEB CUSHING	Massachusetts	Attorney-General	8,000

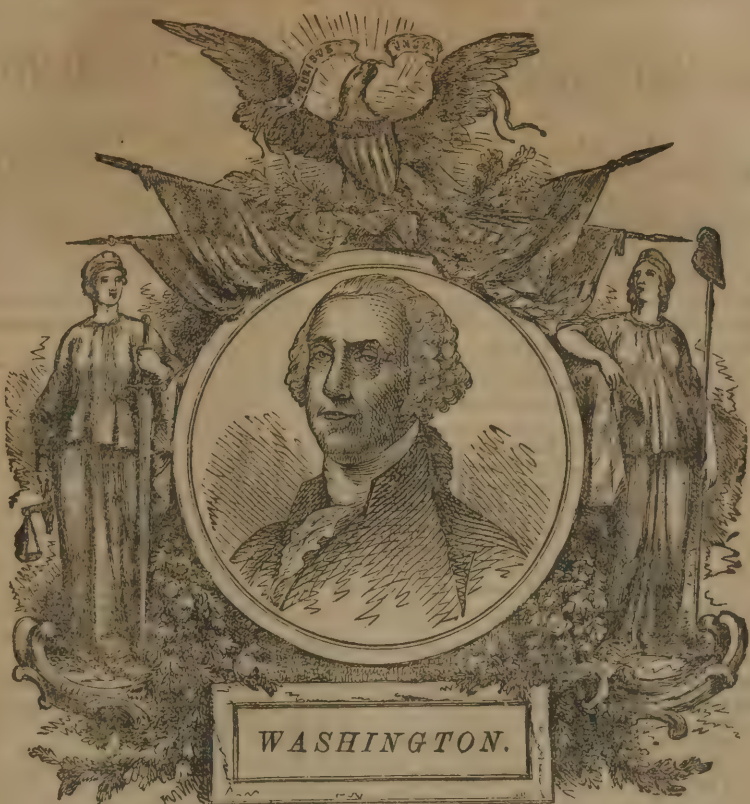

CONGRESS—The SENATE is composed of two members elected by the Legislature of each state for the term of six years. Of course the number of Senators is now sixty-two. The Vice-President of the United States is President of the Senate. In his absence, a President *pro tempore* in chosen by the Senate.

THE HOUSE OF REPRESENTATIVES is composed of representatives from each state, in the ratio of one to every 70,680 of the population. The present number of members is two hundred and thirty-four; and there are seven delegates, one each from Oregon, Minnesota, Utah, New-Mexico, Washington, Nebraska and Kansas territories, who have a right to speak, but not to vote. The compensation of the members is \$3. and that of the speaker \$16. per day during the session, and \$8. for every twenty miles' travel in going and returning.

SUPREME COURT.—Chief Justice, Roger B Taney of Maryland, salary 5,000. Associate Justices, John McLean, Ohio; James M Wayne, Georgia; John Catron, Tennessee; Peter V. Daniel, Virginia; Samuel Nelson, New-York; Robert C. Grier, Pennsylvania; Benjamin R. Curtis, Mass.; John A. Campbell, Alabama; salary \$4,500. This Court is held in Washington, and has but one session annually, commencing on the first Monday in December.

CIRCUIT COURTS.—The United States are divided into *nine* judicial circuits, in each of which a Circuit Court is held at least twice a year for each state within the circuit, by a Justice of the Supreme Court, and the District Judge of the state or district in which the court sits.

DISTRICT COURTS—The United States are also divided into forty-six districts, in which District Courts are held by thirty-six district judges. And in each of the Territories, there is also a Judge and two Associate Judges, appointed by the Executive of the United States.

Another Great and Popular Medicine.

DR. JOHN BULL'S BALSAM OF WILD CHERRY AND ICELAND MOSS,

THE ONLY POSITIVE CURE FOR THAT FATAL DISEASE,
C O N S U M P T I O N,
AND ALL DISEASES OF THE PULMONARY ORGANS,
SUCH AS

Coughs, Colds, Whooping Cough, Asthma, Spitting of Blood, Bronchitis, &c.

KNOWN TO THE WORLD.

This highly concentrated and truly valuable medicine, is not offered to the public as a new and wonderful discovery, but an old and well-tried remedy, being prepared from a receipt which has been in the possession of Dr. Bull and his ancestors for more than a hundred years; neither is the medicine vended for the express purpose of enriching the proprietors. It is an article made for the *public good*, and all Dr. Bull wishes or expects to receive from its sale, is a fair compensation for his time, and expects none of the enormous profits and large fortunes usually accumulated by venders of quack medicines; and, consequently, he has put his Balsam of Wild Cherry in quart bottles, at the low price of One Dollar per bottle, and one bottle will be more than sufficient to cure any ordinary case. This medicine has one great recommendation over all other syrups, balsams, pectorals, expectorants, &c., now before the public. *It is warranted free from Opium, Morphine, or Tartar Emetic*, and consequently will not produce that unpleasant costiveness so frequently resulting from the use of the one thousand and one remedies daily puffed into public notice. Costiveness produces dyspepsia, dyspepsia consumption, and consumption, to those who do not use Bull's Balsam, death; and many who are attacked with a slight cold are induced to use some one of the many *highly recommended balsams*, but more highly tinged with opium, and the consequence is costiveness, consumption, and death.

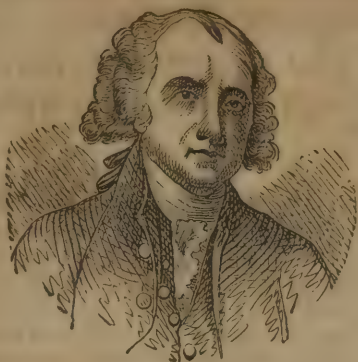

PRUNUS VIRGINIANA—(*Wild Cherry Bark*).

The Wild Cherry-tree grows throughout the Union, flourishing most in those parts where the soil is fertile and the climate temperate, and abounding in the Middle and Atlantic States, and in those which border on the Ohio river. The inner bark is that part employed in medicine, and is obtained indiscriminately from all parts of the tree, though that of the roots is most active, and is always used by Dr. Bull. Its peculiar flavor, as well as medicinal virtues, are injured by boiling, in consequence partly of the volatilization of the principle upon which they depend, partly upon a chemical change effected by the heat. This bark is among the most valuable of our indigenous remedies, uniting with a tonic power the properties of calming irritation and diminishing nervous excitability. It is highly useful in diseases of the chest, lungs, and consumption; in the treatment of which it has long been a favorite with many American practitioners.

LICHEN ISLANDICUS—(*Iceland Moss*).

This plant is found in the northern latitude of the old and new continents, and on the elevated mountains further South. It received its name from the abundance in which it prevails in Iceland. It is also abundant on the mountains, and in the sandy plains of New England. The gum and starch contained in the moss, render it sufficiently nutritive to serve as food for the inhabitants of Iceland and Lapland. The reindeer feeds almost exclusively on it, which is supposed to be the cause of this fleet animal possessing such powerful lungs—giving it greater speed, and enabling it to withstand more fatigue than any other beast on the face of the globe. Iceland Moss is at the same time demulcent, nutritious, and tonic, and well calculated for affections of the lungs and bowels. Hence, it has been found useful in chronic catarrhs, and other pulmonary affections. But the complaint, in the treatment of which it has acquired most reputation, is Pulmonary Consumption. It had long been employed in this disease by Danish physicians, before it became known to the profession at large. In the latter half of the last century it was introduced into extensive use, and numerous cures which have been effected by it are on record.

It is from these two most powerful vegetable remedies, that Dr. Bull's Balsam is principally composed. In the preparation of Bull's Balsam of Wild Cherry and Iceland Moss, heat is not used, and every precaution is taken to make a uniform good article, and Dr. Bull is fully convinced that all who are induced to give it a trial, will be delighted with its wonderful and magical effects. Persons of weak and debilitated constitutions, predisposed to consumption, should use no other remedy: it not only acts as a medicine, but it is nourishing and strengthening to the bowels and system.

CAUSES, SYMPTOMS, AND CURE OF CONSUMPTION.

PNEUMONIA, or Inflammation of the Lungs.—This disease is one of the chief causes of consumption, and, as it effects an organ which is absolutely necessary to life, it must always be attended with much danger unless properly treated. It is more generally fatal to those who have a flat, narrow chest, and to such as are afflicted with asthma, especially in the decline of life. Sometimes the inflammation reaches to one lobe of the lungs only; at other times the whole of the organ is affected. When the disease proceeds from a viscid, pituitous matter, obstructing the vessels of the lungs, it is a thin acid defluxion on the lungs, and is denominated a catarrhal pneumonia.

An inflammation of the lungs is sometimes a primary disease, and sometimes it is the consequence of obstructed perspiration from colds, wet clothes, &c, or from an increased circulation of the blood, by violent exercise, the use of spices, ardent spirits, &c.

The patient, at the beginning, is cold and hot by turns, has a small quick pulse, feels a sense of weight and pain across the breast, breathes with difficulty, and sometimes complains of a pain and giddiness of his head; his urine is unusually pale, and his color very little changed.

In cases of pneumonia, the Balsam of Wild Cherry and Iceland Moss possesses a wonderful healing and renovating power. It removes all pain, irritation, and difficulty of breathing, warms and animates the functions of the pulmonary organs, allays all inflammation and fever, induces easy and profuse expectoration, and frequently, in a few hours, restores the lungs to a healthy and vigorous condition. It is exceedingly pleasant and agreeable to the taste, and perfectly salutary in all its effects upon the system.

PHTHISIS, or Pulmonary Consumption.—Consumption is a wasting of the whole body from ulcers, tubercles, or concretions of the lungs, anemidyeuma, a nervous atrophy, or a cachexy. It was stated by Dr. Arbuthnot, in his time, that consumption made up above one-tenth part of the bills of mortality in and about London; and we know that it has greatly increased.

Consumptions prevail more in England than in any other part of the world, owing, perhaps, to the excessive use of animal food and malt liquors, the general application to sedentary employments, and the great quantity of pit-coal which is burnt; to which we may add the perpetual variability of the weather.

The causes of pulmonary consumption are numerous. An inflammation of the lungs often ends in an imposthume, or ulcer; consequently, whatever disposes people to this disease, must likewise be considered as a cause of consumption. Other diseases, by vitiating the habit, may likewise occasion consumptions, as the scurvy, the scrofula, small-pox, measles, &c. Also, unwholesome air, violent passions, exertions, or affections of the mind; great evacuations, as sweating, diarrhoea, diabetes; the sudden stoppage of customary evacuations, as bleeding piles, sweating of the feet, issues or ulcers of any kind.

Frequent and excessive debaucheries, late watching, and drinking strong liquors, can hardly fail to destroy the lungs.

Consumptions are likewise caught by sleeping with the diseased; therefore they should be carefully avoided.

Occupations in life have much influence in producing it. Persons who sit much, and are constantly leaning forward, or pressing upon the stomach and heart, as tailors, shoemakers, seamstresses, &c, often die of consumption. Workmen in factories are more subject to it than any other class of people. Luxury, want of exercise, excesses of all kinds, saline and aromatic aliments, and every thing which tends to heat and inflame the blood, and relax the system, predisposes to consumptions. It is also frequently the effect of hereditary taint, or a scrofulous habit.

But the great cause of consumption is a common cold. More consumptive patients date the beginning of their disorders from wet feet, damp beds, night air, wet clothes, or catching cold after the body has been heated, than from all other causes combined.

Consumption generally begins with a dry cough, which often continues several months. If a disposition to vomit after eating be excited by it, there is still greater reason to fear approaching consumption. The patient complains of a more than usual degree of heat, a pain and oppression of the breast, especially after exercise; his spittle is of a brackish taste, and sometimes mixed with blood; he is apt to be sad, his appetite is bad, and his thirst is great. These are the common symptoms of a beginning of consumption. Afterwards the patient begins to spit a greenish, white or bloody matter. His body is attenuated by the hectic fever, and colliquative sweats, which mutually succeed each other, viz: the one towards night, and the other in the morning; a looseness and an excessive discharge of urine are troublesome symptoms at this time, and greatly weaken the patient. There is a burning heat in the palms of the hands, and the face generally flushes after eating; the fingers become remarkably small, the nails are bent inwards, and the hair falls off. At last, the swelling of the feet and legs, the total loss of strength, the difficulty of swallowing, and the coldness of the extremities, show the approach of death, which, however, the patient seldom believes to be near.

Such is the usual progress of this dreadful malady, which, if not checked at an early stage, has hitherto set all medicine at defiance.

The most wonderful curative of consumption, in the whole range of pharmacy, is Bull's Balsam. That there may be cases of consumption which no human power can cure, we do not pretend to doubt; but the Balsam of Wild Cherry and Iceland Moss has been used with perfect and triumphant success, in cases where the most eminent members of the medical profession had given up all hope; and no person afflicted with any tendency to consumption, should fail to try it, before it be too late.

ATROPHY, or Nervous Consumption.—A nervous consumption is a wasting or decay of the whole body, without any considerable degree of fever, cough, or difficulty of breathing. It is attended with indigestion, loss of appetite, great uneasiness, languor, fixed melancholy, and general debility of the system.

In cases of Nervous Consumption, Bull's Balsam of Wild Cherry and Iceland Moss is a most potent and salubrious remedy. It excites and invigorates the functions of the body to admiration, and removes at once all tendency to hypochondria and nervous decline. We would recommend, in addition to the use of the Balsam, a light and nourishing diet, agreeable amusements, cheerful company, plenty of exercise in a free, open air, and some mild bitters to brace and strengthen the stomach.

ASTHMATIS, or Asthma.—The Asthma is a disease of the lungs. Persons in the decline of life are most liable to it. It is sometimes hereditary: it may likewise proceed from the fumes of metals or minerals taken into the lungs, violent exercise, especially running, the obstruction of customary evacuations, as the menses, hemorrhoids, etc., or from any cause that either impedes the circulation of the blood through the lungs, or prevents their being duly expanded by the air.

An Asthma is known by a quick, laborious breathing, which is generally performed with a kind of wheezing noise. Sometimes the difficulty of breathing is so great, that the patient is obliged to keep an erect posture, otherwise be in danger of being suffocated.

A fit, or paroxysm of the Asthma, generally happens after a person has been exposed to cold, easterly winds, or has been abroad in thick, foggy weather, or has got wet, or has continued long in a damp place under ground, or has eaten some food which the stomach would not digest.

Asthma requires larger doses of the Balsam than any other disease of the lungs, and the patient should persevere in its use until he is cured, which certainly will be the case, as it has never been known to fail in effecting a cure.

THE GREAT SPRING AND SUMMER MEDICINE.

DR. JOHN BULL'S SARSAPARILLA is the most effectual purifier of the blood and all the secretion: of the human system. Our most eminent physicians pronounce it to be an unequalled Tonic Medicine for derangement of the Bile by change of seasons, sickness at the Stomach, want of Appetite, Headache, Dizziness, Indigestion, Dyspepsia and Liver Complaints.

Advice to those suffering from Colds, Coughs, and Consumption.

When a cold has been contracted, immediate means must be employed to open the pores before the cold gets seated. The first and best means is to drink warm fluids, to bathe the feet, and, if possible, the whole body in warm water.

Warm clothing is essential to a cure. Woollen garments are the best.

Sleep warmly at night; be careful of draughts of air.

Out-door exposure is not injurious, if the clothing is sufficient to warmth, to the shape of the body, and in a condition to take exercise. If feverish, then it is better to remain at home till the fever is abated.

If costiveness accompanies the cold, with feverishness, take a cathartic, such as Stainburn's Vegetable Extract Pill, to open the bowels moderately and effectively.

If subject to cough on lying down take a table spoonful of Bull's Balsam of Wild Cherry before retiring, and you will rest easy.

If subject to cough on awaking in the morning, take two or three teaspoonsful of the Balsam at intervals of five minutes before rising.

Whenever during the day there is an inclination to cough, use the Balsam at intervals in small doses until the inclination ceases.

If troubled with lightness at the CHEST, difficulty of breathing, tickling in the throat, or hoarseness, use the Balsam frequently and swallow it very slowly in small doses.

GOING TO LAW.—At the close of a recent trial in regard to the ownership of a cow, in which 35 witnesses were examined, the successful claimant was obliged to sell the cow at auction in order to raise funds to pay his lawyers.

The Mother and Child.

What a beautiful and interesting relation is that which exists between mother and child! The love of a mother is the most pure, holy and unselfish passion of the human heart—and the dependence, reliance and confidence of the child on the mother's love and devotion, is a delightful theme for contemplation for the philanthropist. But how his heart must bleed, when he sees that devoted mother bending over her child, herself writhing in pain and suffering from the influence of disease, and her beauteous babe covered with scrofulous sores!—if she has no remedy, nor can procure any for their relief. But, *there is a Balm, yea, a Balm in Gilead!* that has never failed to eradicate Scrofula in all its multiplied forms—and mothers should at once procure Dr. Bull's Genuine Sarsaparilla, and lose no time in taking it herself, and thus dispense to her babe its healing qualities, which is sure to heal both mother and child. Thousands of such cases have come under our special notice in the past year, and no mother has yet tried it, without being delighted with its effects. As a female medicine, Bull's Sarsaparilla has no equal on earth—as a regulator of the system—for this valuable Preparation of Doctor Bull's has been prepared in strict reference to "Female Complaints." Ladies of all weakness and lassitude from using but few doses become robust, and full of energy under its influence. It immediately counteracts the nervousness of the female frame, which at times is the great cause of barrenness—and to those females it is specially recommended as superior to all the "invigorating cordials" ever offered for debility, impotency or all irregularities of nature.

NOTICE TO FEMALES.

John Bull's Sarsaparilla is one of the greatest female medicines now in existence. In those numerous cases where the constitution is debilitated, the nervous energy is lessened when the efforts of nature are weak and deficient, or are profuse and overwrought, when the face is pale and colorless, the strength feeble and yielding, the spirit troubled and depressed, the health broken, the mind shaken, and consequently the happiness destroyed, then Bull's Sarsaparilla is a sovereign remedy. It assists nature in the performance of her duty, braces the whole system, renews permanently the natural energies, removes obstructions, checks excesses, creates pure and healthy blood, and imparts health and happiness. Were ladies generally to adopt the use of this medicine, we would see far less suffering, disease, and unhappiness among them than now exists; health would take the place of disease; the rosy cheek would succeed the pallid face; we would have smiles instead of tears, and perhaps a happy long life instead of one cut short by disease, or made miserable from continued suffering and affliction. At that critical period termed the "Turn of Life," which is often attendant with so much danger, Bull's Sarsaparilla is found to exert a most beneficial effect. All ladies approaching this crisis should be

apprised of this fact, and avail themselves of this valuable medicine.

DEATH.

Where I shall die—I know it not,
Nor where my ashes shall be laid;
Only be it my happy lot
With saints relieved to leave the dead:
Small care to me the place affords—
The earth throughout is all the Lord's.
But when in death I shall recline,
Then let my soul ascend to thee:
Through Christ's redemption I am thine,
By faith his glories now I see.
'Twill all be well! I little prize
Where, how, or when this body dies.
When I shall die, is all unknown,
Except to thine omniscient mind;
And lest with life my hopes be gone,
May I from thee such favor find,
That I may always be prepared
For death, and for thy great award.
How I shall die, to ask were vain;
Death does his work in varied forms:
To some with agonies of pain,
And some sink peaceful in his arms.
Just as thou wilt, if, when 'tis past,
My soul be found with thee at last.

God on the Ocean.

We were crowded in the cabin,
Not a soul did dare to sleep;
It was midnight on the waters,
And a storm was on the deep.
'Tis a fearful thing in winter,
To be shattered in the blast,
And to hear the rattling trumpet
Thunder, "Cut away the mast!"
So we shuddered there in silence,
For the stoutest held his breath,
While the hungry sea was roaring,
And the breakers talked with Death.
As we sadly sat in darkness,
Each one busy at his prayers,
"We are lost!" the captain shouted,
As he staggered down the stairs
But his little daughter whispered,
As she took his icy hand,
"Is not God upon the ocean,
Just the same as on the land?"
Then we kissed the little maiden,
And we spoke in better cheer,
And we anchored safe in harbor,
When the morn was shining clear.

POLITENESS AT HOME—Always speak with the utmost politeness and deference to your parents and friends. Some children are polite and civil everywhere else, except at home; but *there* they are coarse and rude enough. Nothing sits so gracefully upon children, and nothing makes them so lovely, as habitual respect and dutiful deportment towards their parents and superiors. It makes the plainest face beautiful, and gives to every common action a nameless but peculiar charm.

SOMETHING NEW AND VALUABLE!!

THE most powerful King on the face of the globe, now reigns supreme in the American republic. The power of the crowned heads of Europe sinks into insignificance, when compared to that of our American King.

European kings employ the authority vested in them to increase the riches of the rich and lordly, and to reduce to greater misery and degradation the poor and dependent. Our American King goes forth with equal willingness to the lordly mansion and humble cabin, ready alike to administer relief, and to offer health and happiness to the lofty and the lowly, the rich and the poor.

DR. JOHN BULL'S GREAT AMERICAN KING

Is the TENTH WONDER OF THE WORLD, and the greatest blessing ever offered to afflicted humanity; to the suffering millions the Doctor can say, relief is at your command. You have only to use this magical remedy. All those who still suffer, and will not accept the proffered Balm, deserve not the pity of their families.

This wonderful medicine, during the brief period since its introduction, has carried happiness to the hearts of thousands, and made life a charm to many who heretofore regarded it only as a painful and miserable existence.

To the winds with all Liniments, Embrocations, Pain Killers, and Pain Extractors, and let millions of glad tongues proclaim the merits of the great "American King of Pain," a preparation composed solely of vegetables and roots, produced by America's own rich and bounteous soil.

We would ask the *Ladies*, who are always competent judges of what is and what is not a valuable family medicine, to do us a special favor by giving the King of Pain a single trial, and, if satisfactory, exert their influence in its behalf, recommend it, speak well and often of it, and see that it is used by their afflicted neighbors. The ladies are always charitable, and when they induce their suffering friends to use this really valuable medicine, they will be doing an act of benevolence that they can well be proud of. This is a powerful and truly magical remedy for all external diseases, sores, swellings, burns, &c, and for many internal afflictions it is a certain cure; yet it is perfectly harmless, and incapable of producing the least injurious effects in the most delicate cases or the weakest constitution.

It is entirely useless to follow the old and worn-out system of publishing to the public thousands of certificates of wonders performed by this medicine. It costs but twenty-five cents to try it; and Dr Bull stakes his well-earned reputation on the King of Pain doing all, and more, than he claims for it.

We would ask, have you the *Rheumatism* or *Gout*? these are not pleasant companions, and we know that you would like to drive them away as quick as possible; then use "Bull's King of Pain."

Would you be cured almost immediately of Bowel Complaint, Dysentery, Summer Complaint, Cholera Morbus, Cramp Colic, Headache, Toothache, or any other ache or pain, the remedy is simple and the cure certain—use the great King of Pain.

Would you have your Sores, Swellings, Cuts, Burns, Scalds, Bruises, or any other wounds healed, we repeat it, use the "Magical King of Pain." Would you be cured of Scald Head, Stiff Joints, Sore Throat, Neuralgia, Sore Breast, Lumbago, Tetter or Ring Worm, Salt Rheum, Bites of Poisonous Insects. Chapped Hands, and all other Sores, either dry or running, we say again and again, your remedy is Dr. John Bull's "King of Pain."

Would you be cured of King's Evil, Cancer, Tumors, Eruptions, or any disease of the skin caused by impure blood, then use Dr. John Bull's Sarsaparilla internally, and the King of Pain externally; nothing can be more certain than a speedy and effectual cure.

DR. JOHN BULL'S KING OF PAIN

is the MIGHTY CONQUEROR of that Fell Destroyer of human life.

ASIATIC CHOLERA.

It is sanctioned and ordered to be used on board all the
EUROPEAN EMIGRANT PACKET SHIPS

In consequence of the prevalence of cholera, the owners of several of the packet-ships between New-York and Liverpool, have given notice that they will not convey any more emigrants. The *New-York Journal of Commerce* says:

"This course of action is the one that humanity dictates, rather than any pecuniary interest. Passage being in advance, ship owners are little affected by any subsequent mortality on board ship. Still that must be an indurated heart that could remain unmoved, while scores of lifeless human bodies are thrown overboard from almost every ship (with stones tied to their feet), and the shipping-offices are besieged by emaciated, heart-broken, and poverty-stricken survivors, imploring relief.

"A partial suspension of emigration such as is contemplated, will avert the repetition of scenes such as have occurred in this city in previous winters, arising from the impossibility of readily providing for the multitude of destitute emigrants flocking hither.

"A remarkable circumstance is noticed in connection with the disease prevailing on ship-board, which we have not heard spoken of, viz.: that the peculiar malignity is only manifested upon reaching a certain latitude—the distempered atmosphere seeming to extend in veins or distinct currents—so that sometimes all evidence of disease lurking in the atmosphere disappears long before reaching port."

The cholera is the most terrible and alarming disease found on the entire list of human complaints; yet, even this fatal malady has been robbed of its terrors by the introduction of Dr. John Bull's "King of Pain," and had those very philanthropic ship-owners, who have given orders to their agents and captains to bring no more emigrants during the prevalence at sea of cholera, given instructions to have their medicine-chests provided with a few dollars' worth of "Bull's King of Pain," then there would have been no need of throwing scores of lifeless bodies into the sea, with stones tied to their feet, as food for sharks; but with the aid of a few doses of the "King of Pain," nineteen out of twenty could have been brought to land, sound and healthy, to greet their anxious connections, husbands and children.

This magical medicine will cure cholera, by correcting the acid on the stomach, assisting digestion, giving tone and strength to the bowels, stopping almost immediately all unnatural discharges, aiding the liver to perform its natural functions, and strengthening and invigorating the whole system. It is a great medicine in sickness, and in health an invaluable tonic. No matter how healthy you are, or how well you feel, you will feel better by taking a teaspoonful of the "King of Pain" every morning. Let every person try the experiment with one bottle; it will only cost twenty-five cents, and its good effects will be astonishing.

OPINIONS OF THE PRESS.

The best evidence in favor of a medicine, is the opinions of the press. Read what is said of Dr. Bull and his medicines, in the Louisville Daily Times:

"DR. JOHN BULL.—By reference to the very correct likeness of this distinguished inventor and originator of the famous Sarsaparilla and the 'King of Pain,'—the virtues of this latter panacea for all kinds of pain will be found succinctly set forth in the advertisement.

"For a series of years, Dr. Bull has devoted his untiring energies to the investigation of the origin and source of disease, and the preparation of suitable remedies. In doing so, he has been guided by an earnest wish to produce such remedies as will leave the stomach uninjured, and in a sound and healthy state; at the same time, they are sufficiently powerful to eradicate disease. Hence he has employed in the composition of his great healing compounds a combination of vegetable substances, entirely discarding the use of minerals, so much in vogue as purifiers the blood, the impurities of which are confidently believed to be the prime cause of all disease.

"The sale of Bull's Sarsaparilla has been most extensive, and might have realized to the inventor a splendid fortune. But he is not what is called a wealthy man. He has employed the constant revenues derived therefrom in liberal advances to the press, and in pursuing his indefatigable researches into the arcana of medicine and the properties of natural remedies. He has ascertained that Rheumatism, in its worst forms, will yield to his great remedy, which he styles the 'King of Pain.' It is a sovereign remedy for all sorts of pain, and defies competition even from the chiropodist himself.

"A writer in one of the Western papers draws the following sketch of Dr. Bull's *personnel*:

"Dr. Bull is a native of Kentucky, about forty years old, much after the order of John Randolph of Roanoke, *long, lean, lank and eccentric*, with a remarkably intellectual face, gray eye, light hair, and would strike the casual observer as being a man of no ordinary mind."

"The Doctor resides in this city, and has his laboratory here, from which he dispenses his valuable fluids to the farthest part of the country, in vast quantities. His business increases with each year, and the time is not far distant when he may be set down as one of the most eminent of Western millionaires."

[From the Louisville Courier.]

"We call particular attention to the advertisement, in to-day's paper, of our distinguished friend, Dr. John Bull's new remedy, 'King of Pain.' The unprecedented success which his justly popular medicines, 'Fluid Extract of Sarsaparilla,' and 'Balsam of Wild Cherry and Iceland Moss,' have met with wherever introduced, and the numerous testimonials that have been tendered him from those they have relieved, warrant us in predicting for the 'King of Pain' an unparalleled demand. Such is our opinion of the curative power it possesses, that we cheerfully recommend its use to those suffering from diseases for which it is a specific."

[From the Louisville Journal.]

"DR. JOHN BULL.—Since our office has been in its present location, we have seen but little of the operations of our old neighbor, Dr. John Bull, the inventor and manufacturer of the world-renowned Sarsaparilla. Happening to pass his establishment the other day, curiosity prompted us to see how he was getting on. We found the Doctor up to his neck in business. His manufactory appeared like a bee-hive; some were filling bottles, some boxing them up, some marking, &c. The Doctor's business is daily increasing, notwithstanding the hundreds of new compounds that are constantly introduced. His business has become so large, that he has determined to erect a large six-story establishment during the present year. He is in a fair way of becoming a millionaire, yet the same kind, affable, and charitable traits are distinguishable in him that characterized him before he was affluent."

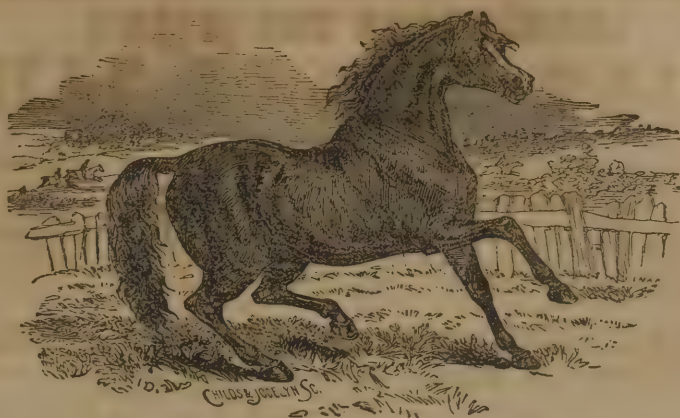

[From the Louisville Democrat.]

"DR. JOHN BULL'S KING OF PAIN. A new remedy has been introduced to the world by John Bull, under the title 'King of Pain.' It does seem as if Dr. Bull has something of magic in him; for having, by his Sarsaparilla, cleansed and purified the blood of the million, he now has introduced a remedy to dissipate all pain from the human system.

"This last discovery has met with great public favor, and promises to have a more extensive use than the first. Already the sales of Bull's 'King of Pain' to druggists and Merchants in the city and country are very numerous, and, strange as it may seem, a large number of hands constantly employed do not more than keep pace with the orders for this remedy."

[From German Anzeiger.]

"We invite special attention of our readers to the advertisement in to-day's paper, of our celebrated friend, Dr. John Bull's new medicine, 'King of Pain.' The fame that Dr. John Bull has acquired throughout the entire Union for his preparations of the 'Fluid Extract of Sarsaparilla' and 'Balsam of Wild Cherry and Iceland Moss,' cannot fail to establish this new medicine in popular confidence; and from the remarkable and prompt effects we hear produced from its use, we with pleasure recommend it to those afflicted with diseases which it is promised to cure, believing it will give entire satisfaction."

THE KING OF PAIN

IS THE JOCKEY'S DELIGHT AND THE FARMER'S WONDER.

It acts like magic upon horses.

The good effects of one bottle given or used according to directions will be easily seen within

Twenty Four Hours.

For be it known, that what is good for the pains of man, is also good for the pains of horses; and what will cure man of disease, will also cure his horse. "Bull's King of Pain" will cure all Cuts, Bruises, Sprains, Spavins, Wind Galls, Sore Back, Poll Evil, Sweeny, Splint, Sore Eyes, Scratches, and all other external diseases or wounds that horses or other animals are subject to. It will also cure *all and every* internal disease.

Dose—The contents of one twenty-five cent bottle, night and morning given in a half-pint of whiskey. Two or three bottles are generally sufficient, to cure all internal diseases; and one bottle will usually cure all external complaints, cuts, or wounds. Who will not pay twenty-five or fifty cents to save the life of his fine horse! We shall see if such a man lives. "Bull's King of Pain" is in reach of all.

This valuable and magical medicine is

Prepared by Dr. JOHN BULL,

AT HIS LABORATORY, NEW YORK,

And can be purchased of all respectable Druggists and Merchants in the United States, Canada, Mexico, and the West Indies.

MOST IMPORTANT CAUTION!

Notice that each bottle you purchase has blown in the glass these words, "JOHN BULL'S KING OF PAIN, NEW-YORK. ENT'D ACCORD'G TO ACT OF CONGRESS." And on the front side a label with the likeness of Dr. John Bull, and these words at the bottom of it: "Entered according to Act of Congress, in the year 1855, by John Bull, in the Clerk's Office of the District Court of the United States for the Southern District of New-York. None other can be genuine.

DIRECTIONS FOR USING BULL'S KING OF PAIN.

To Cure Rheumatism or Gout,

Take one teaspoonful three times a day, and bathe the parts afflicted well with the medicine, by rubbing it on with the hand. The dose for children must be lessened, according to age. It is well to keep a piece of flannel wet with the King of Pain constantly over the place where the pains are most severe.

For Bowel Complaint, Dysentery, Summer Complaint, Cholera, Cholera Morbus, Cramp Colic,

Or any other Disease of the Bowels, or Pain in the Stomach, a grown person must take a teaspoonful three times a day, and a piece of flannel laid on the stomach, and kept constantly wet with the King of Pain. For children, use the medicine the same as for grown persons, giving an infant for a dose five drops; one year old and under three, ten drops; three years old and under five, fifteen drops; five years old and under ten, twenty drops; from ten to fifteen years half a teaspoonful. It is best, when the King of Pain is taken internally, to give it in sweetened water, tea or molasses.

For Sores, Swellings, Cuts, Burns, Scalds, Bruises,

Or any other wounds; Scald Head, Stiff Joints, Sore Throat, Neuralgia, Sore Breast, Lumbar, Tetter or Ring Worm, Salt Rheum, Bites of Poisonous Insects, Chapped Hands, and all other sores, either dry or running—apply the King of Pain as you have been accustomed to use all other liniments.

To Cure King's Evil, Scrofula, Cancer, Tumors,

And Eruptions of the Skin, use Dr. John Bull's Sarsaparilla internally, and apply the King of Pain externally, and you will get well.

For Headache,

Bathe the forehead and temples with the King of Pain, and take a dose occasionally, and you will be speedily relieved.

To Cure the Toothache:

If the tooth is hollow, wet a piece of cotton with the King of Pain, and put it into the cavity; also, hold some in the mouth for a few minutes, and rub it on the jaw. For Jaw-ache, rub the jaw with the King of Pain, and hold some in the mouth.

SCARLET FEVER!

This disease is very unjustly regarded as dangerous and hard to manage. No complaint yields more readily to proper treatment; but give calomel and other strong medicines, and you had as well order a coffin.

So soon as you have the slightest reason to think that you are about to have Scarlet Fever, confine yourself in a close room, and keep the temperature as near the same as possible, neither too warm nor too cool. Grease the whole body with old fat bacon, and keep thin slices bound around the throat and under the jaws. Take a dose of "Bull's King of Pain," in warm tea, three times a day, and no other medicine. When the disease is fairly out, discontinue the medicine, but continue the grease until you are entirely well. Follow the same treatment with children, no matter how young, and you will cure every case. This treatment is plain and simple, and just what the disease requires. In Scarlet Fever, medicine kills nine to the disease one. If you will follow the above directions, neither disease nor medicine will prove fatal.

This King of Pain will also be found the best remedy in existence for all external diseases of Horses and Cattle, such as Sprains, Splint, Scratches, Wind Galls, &c., and will cure Sore Back and Flesh Wounds almost immediately. Try it, and you will be convinced.

CHOLERA INFANTUM,

For Summer Complaint of Children,

Prevails during the hot months of summer. It is distinguished by violent vomiting and purging, and great emaciation; it is rapid in its progress, and soon sinks the little sufferer into a fatal prostration, unless the disease is arrested before the patient is too far gone. Of all the diseases to which children are liable, this produces the most frightful mortality. A few drops of

DR. JOHN BULL'S KING OF PAIN

administered according to the directions, will at once arrest the vomiting and purging, allay the irritation of the stomach and bowels, and save the child from the danger which threatens it.

Diarrhœa, or Looseness in Children.

This form of bowel complaint is very common among children; it is frequently produced, or kept up, by eating unripe fruit or improper diet. All such fruits should be forbidden to the child. A few drops (from three to ten according to age) of the King of Pain should be administered and the disease will soon pass away.

N. B. No family should be without this great remedy, as every thing depends on giving it promptly, if you once use it you will never be without it for the sake of twenty-five cents. I speak as a friend.

JOHN BULL.

There was great comfort to a desponding man in the answer he got from a friend to whom he was confiding his gloomy apprehensions of the future. "I don't see," said Mr. Blues to Mr. Bright, "how I shall ever get through the world."—"Did you ever hear," asked Mr. Bright, "of one who got stuck by the way?"

Professor Everett, once the American ambassador to the Court of Saint James, was entertained at a public dinner before leaving Boston. Judge Story gave as a sentiment—"Genius is sure to be welcome where Everett goes." Everett responded—"Law, Equity, and Jurisprudence: no efforts can raise them above one Story."

A lady who must be a relative of Mrs. Partington, we think, "by marriage" at least, was entertaining some friends with a fine leg of mutton at dinner the other day, when one of her guests remarked that the mutton was exceedingly fine in quality. "Oh, yes," said she, "my husband always buys the best. He is a great *epicure*."

Mrs. Partington has bought a horse so spirituous that he always goes off in a decanter.

A love-sick young gentleman, who has taken very much of late to writing sonnets, has just hung himself with one of his own lines.

It having been stated that a man in New-York got himself into trouble by marrying two wives, a western editor remarked that a man in Michigan had done the same by only marrying one. Next day his office was crowded by married men, every one asking—"Did you mean me?"

Some crusty, rusty, fusty, musty, dusty, gusty curmudgeon Batchelor of a man, gave the following toast at a celebration:—"Our fire engines—may they be like our old maids—ever ready, never wanted."

TO PRESERVE A BOUQUET.—A florist of many years' experience, gives the following receipt for preserving bouquets for an indefinite period, which may be useful to our lady readers:—"When you receive a bouquet sprinkle, it lightly with fresh water. Then put it into a vessel containing some soap suds; this will nutrify the stems, and keep the flowers as bright as new. Take the bouquet out of the suds every morning, and lay it sideways (the stock entering first) into clean water; keep it there a moment or two, then take it out, and sprinkle the flowers lightly by the hand with water. Replace it in the soap suds as before.

THE RIGHT ROAD.—English traveller—"Hi say, sir, ham hi on the right road to Artford?" Jonathan—"Well, if you turn round and go t'other way you'll have to travel about ten miles. But if you keep on the way you're going, you'll have to go about eight thousand I reckon."

TO MAKE STARCH POLISH.—Take 1 oz. Spermaceti, and 1 oz. White Wax; melt, and run into a thin cake on a plate. A piece the size of a quarter dollar, added to a quart of prepared Starch, gives a beautiful lustre to the clothes, and prevents the iron from sticking.

BLUEING FOR CLOTHES.—*better and cheaper than Indigo*.—Take 1 oz. of soft Prussian Blue, powder it, and put it in a bottle with 1 quart of clear rain-water, and add $\frac{1}{2}$ oz. of Oxalic Acid. A teaspoonful is sufficient for a large washing.

A great Discovery!
AGUE AND FEVER

PERMANENTLY CURED BY THE USE OF

DR. JOHN BULL'S Celebrated Vegetable

TONIC PILLS,

(Purely a Vegetable Preparation.)

THE BEST REMEDY NOW IN USE FOR THE CERTAIN AND
PERMANENT CURE OF FEVER AND AGUE.

Prepared only by JOHN BULL, sole proprietor, and sold, wholesale and
retail, at his principal offices

Corner of Broadway and Cortlandt-street, No. 2 Gilsey Buildings, New-York,
and No. 1 Fifth-street, Louisville, Ky.

This valuable medicine is offered to the public as one of the most sure and certain remedies ever discovered for the permanent cure of AGUE and FEVER, in all of its various forms. It possesses many advantages over most of the Tonics which now flood the country, the causes of which are, 1st. It is a more certain remedy, as one dose seldom fails to make a sure and lasting cure. 2d. It contains nothing deleterious or poisonous to the system, consequently it may be taken without fear of any of the bad effects which attend the use of most of the Tonics of the present day. 3d. It is more convenient for transportation, and not liable to loss from freezing, breaking, leakage, and other accidents which attend the liquid remedies. 4th. It is more convenient and pleasant to take, and is not so nauseating. 5th. It increases the appetite and braces the whole general system. And, lastly, is offered much cheaper than most other Tonics now in use, which places it within the reach of every one, so that the poor man is enabled to save his Doctor's bill and escape days, and, perhaps, weeks of sickness.

The proprietor has received, and is daily receiving, numerous certificates and testimonials of the efficacy of this Tonic; but knowing as he does the imposition which has been practised upon the public in the way of false certificates in bringing a medicine of this kind into notice, will only insert two received from two of our oldest and most respected citizens, to whom any one may refer if they doubt the efficacy of this medicine.

There are Four Sound Reasons why

DR. JOHN BULL'S VEGETABLE TONIC PILLS

are the most safe and convenient medicine for the cure of Bilious Fevers and Fever and Ague.

1st. Because they are of themselves alone able to grapple with disease and drive it out.

2d. Their LAXATIVE properties are so eminently and beautifully balanced with their Tonic VIRTUES that they act in concert and do not require any purgative to help them.

3d. They do not require any change of diet or any preparation of the system before taking them, as they possess full power to correct all that may be wrong.

4th. They are the cheapest in the end, as they are sure to effect a cure, and in all ordinary cases one box is sufficient.

CERTIFICATES.

I had a nephew afflicted with the Fever and Ague, and bought a box of Bull's Vegetable Tonic Pills, which performed a perfect cure; and I do recommend them to the public as the best medicine now in use for the cure of Fever and Ague.

R. BUCKNER.

Louisville, December 20, 1846.

Mr. Bull having requested me to state what I know in relation to the efficacy of his Tonic Pill in the cure of Ague and Fever I will say that I never used them myself, but received a couple of boxes from Mr. William T. Spurrier as a donation to a poor family, and they speedily cured eleven out of thirteen, and the only remaining two were very small children unable to swallow Pills. This was a large afflicted family and connections, from St. Louis on their way to Tennessee.

J. H. OVERSTREET, Chemist.

Louisville, May 1st, 1846.

FIRST INTRODUCTION
TO THE MIDDLE & EASTERN STATES
OF

Dr. John Bull's Vegetable Tonic Pills,
for the treatment and permanent
CURE OF FEVER AND AGUE.

In presenting to the people of the Eastern and Middle States my remedy for the treatment and permanent cure of all Bilious Diseases arising from a torpid, obstructed and diseased state of the Liver, I will briefly state that I do so with the most unbounded confidence of its complete success having for many years prescribed it in the late field of my labors the great Western country and watched at the bed-side of the sufferer the operation of its wonderful Tonic Powers until the sallow and dejected visage, and the dim and sunken eye began to brighten with a ray of hope, and I have seen that hope ripen to the glad reality of health and strength. My Vegetable Tonic Pills are not a new discovery, having been in use very extensively for five or six years with unflinching success in that great hot-bed of bilious diseases the new broken and low countries of the far Western States. Amongst the various forms of bilious diseases over which the Tonic Pills have complete control, stands first and foremost FEVER AGUE, CHILL FEVER, DUMB AGUE, INTERMITTENT and REMITTENT FEVERS, and BILIOUS FEVERS, all of which are generally preceded by some few days of periodical headache. I shall not weary the patience of the reader by searching into the probable cause or causes of these diseases, they are many and varied, depending much on the susceptibility of constitution, or habits and manner of living, and last not least LOCALITY OF HABITATION and the purity or impurity of the air we breathe. To come at once to the FACT (let the cause be what it may), a man or woman is taken sick; what shall we do? The first thing is to look at the symptoms, and like an index they will to the experienced eye point out the malady, but what are these SYMPTOMS? Let us see. The patient complains of head-ache, feels indisposed to any kind of exercise, gloomy and weary unfit for mental or bodily labor, forgetful, drowsy, yet cannot sleep more than five minutes at one time, the skin and eye-balls bear a deep tinge of yellow, the appetite is uneven and capricious, at times desiring more than nature requires, and at other times so perfectly dormant that even the thought or smell of food will occasion a sick and nauseous feeling. These symptoms are a sure indication of a derangement of the Bile, which having been diverted from its natural course, becomes mingled with the blood and by that fluid circulated to every part of the system, hence the yellow skin and blood-shot eye-ball, but this is not all, the great danger is more than skin deep, the work of destruction is rapidly going on inside, and that which should be the FOUNTAIN OF LIFE to the body, is swiftly conveying the seeds of DEATH to the very seat of vitality. But why is this derangement? Why is the bile mixed with the blood? It is because the Liver refuses to perform its natural functions, it lays still and inactive by having become obstructed and swollen from some unnatural cause, consequently the blood passes it without its action, which would be were it in a healthy condition to separate the bile from the blood and pass it by means of the stomach and bowels away out of the system, the blood would then be purified and becomes the crimson fountain of health, constantly circulating and supplying new bone, and new nerve, and new flesh to replace the daily wear and tear of the body. But be it remembered this bile, which is so frequently abused and harshly spoken of is quite as essential to our existence as is our blood, for without its assistance our food will not digest, and *we could not make blood*, therefore, when the Liver refuses to supply bile through the proper channel and in proper quantity, the stomach is without action, the bowels become out of order, sometimes costive, and sometimes quite the reverse, the discharges are of a varied and unnatural color, at times like white clay and at other times of a greenish cast. But all these symptoms and sickness may be avoided by a timely use of Dr. John Bull's Vegetable Tonic Pills—as a preventive of bilious attacks they are without any superior; no person or family travelling in the Western Country are safe without them, the unacclimated may be perfectly well and healthy, when they lay down at night, but before daylight returns they may awaken with the shake of ague upon them, and it is at such a time Bull's Tonic Pills have proved themselves to be the wonderful preventives of Chills and Fever—when they are taken they go directly to the seat of the disease and exert such prompt action upon the liver, that it is immediately stimulated to resume its proper action, and the progress of disease is stayed; thousands of boxes have been sold and used, none of which have been known to fail in curing; hundreds of certificates have been received from Medical Men of the first standing and from families in the Western Country of their efficacy and superior virtue over all other preparations now in use for the cure of Fever and Ague, &c. Let all who are of a bilious habit try them and use them according to directions, and they will soon feel their whole system renovated and a new vigor added to their mental and bodily powers. Dr. John Bull's Vegetable Tonic Pills may be safely used by all persons of all ages, at all times and under all circumstances, without the possibility of any bad results, as they are purely vegetable. All bilious fevers of whatever type may be prevented by an occasional dose of the BULL'S VEGETABLE TONIC PILLS—see bill of directions on another page of this book.

VALUABLE RECEIPTS FOR FAMILIES AND EVERYBODY.

A Valuable Table.

The following table was first published in Mr. Ruffin's Farmer's Register:

A box 24 by 16 inches square, and 22 deep, contains a barrel, or 10,752 cubic inches.			
" 24 "	16 "	11 "	half barrel, or 5,376 "
" 16 "	16 8-10 "	8 "	bushel, or 2,150 4-10 "
" 12 "	11 2-10 "	8 "	half bushel, or 1,075 "
" 8 "	8 4-10 "	8 "	peck, or 537 6-10 "
" 8 "	8 "	4 2-10 "	half peck, or 268 8-10 "
" 4 "	4 "	4 8-10 "	half gallon, or 141 4-10 "
" 4 "	4 "	4 2-10 "	quart, or 67 2-10 "

Prize Method of Curing Hams.

The Hams of Maryland and Virginia have long enjoyed a wide celebrity. At the last exhibition of the *Maryland State Agricultural Society*, four premiums were awarded for Hams. We are informed by those who had the opportunity of examining them, that they were of first-rate quality. The following is the *Recipe* by which the Hams were cured that obtained the *first premium*:

To every 100 lbs. of green Hams, take 8 lbs. of ground *Alum Salt*; 2 lbs. brown *Sugar* (or *Molasses* equivalent,) 2 Ounces *Saltpetre*; 2 Ounces *Pearlash*, and 4 Gallons *water*. Dissolve well, skimming off the skum arising on the surface. Pack the Hams compactly in a tight vessel or cask, rubbing the fleshy part with fine salt as you put them down, and be sure to stand them on the *small end*, when you place them in the barrel. In a day or two, pour the above pickle over the meat, taking care to keep it *covered with the pickle*. In four to six weeks, according to the weight and size of the Hams, (that is to say, the longer period for heavy Hams,) hang them (hock up) to dry. Let them remain for 3 or 4 days, and then smoke with *green hickory wood*, or *corn-cobs*. Smoke, until the rind becomes a dark brown. The meat should be perfectly cool before packing.

Wash for Sore Eyes in Animals.

Take of *White Vitriol*, two Scruples; *Sugar of Lead*, one Drachm; *Water*, one Pint. Mix. Wash the eye with this twice a day.

Ague in the Face.

Make a good sized poultice of *Ginger and Flour*, mix in twenty drops of the KING OF PAIN, and apply it *warm* to the face. Or,

Steam the jaws or face over *bitter herbs*. Or

Dip a piece of cotton or lint in Dr. John Bull's KING OF PAIN, and place it *in the mouth*, between the cheek and the teeth. A free discharge of *Saliva* follows, which usually gives immediate relief.

Cramp in the Stomach.

Take from 30 to 50 Drops of the KING OF PAIN on *Sugar*, and repeat the dose every 10 minutes, until relieved.—Or, take ten drops of the *essential Oil of Hemlock*, in a little warm tea, sweetened. At the same time apply *Hops*, simmered in *Vinegar*, as warm as can be borne, to the *Stomach or Chest*.

Sore Lips.

Wash the lips two or three times a day with a strong *Tea* made from the *Bark of White Oak*. At night, anoint them with the *Black Salve*.

Urinary Obstructions, &c.

Drink freely of *Parsley Root Tea*. Or, steep *Pumpkin* or *Watermelon Seeds* in *Gin*, and drink about three glasses a day. Or, take one Ounce of *Uva Ursi*, and pour upon it a Pint and a half of *Boiling Water*. Boil it down to a Pint. The dose is a small wine-glassful, two or three times a day.

Internal Cure for the Piles.

Take *Cream of Tartar*, and *Pulverized Jalap*, of each One Ounce; *Electuary of Senna*, Two Ounces; *Flowers of Sulphur* and *Nitrate of Potash*, of each Half an Ounce. Add *Molasses* sufficient to make a thick mass: roll into small cakes, quarter of an inch square; dissolve one in water, and take every night. Continue this for 2 or 3 weeks, and it will rarely fail to cure. At the same time be careful about the diet.

For Inflamed Eyes.

Take the *whites* of two *Eggs*, and stir them briskly with a lump of *Alum*, until a *Curd* is formed. Place this on the closed lid at night, and bind it on. It should be removed in 3 or 4 hours.

Remedy for taking the Fire out of Burns.

Take a ripe mellow *Apple*, pare, core, and beat it up with a little *Sweet Oil*, until it is a pretty soft poultice. Lay this directly over the *Burn*, and renew it every hour. It is a very effectual application. Or,

Take *Olive Oil* and *Lime Water*, of each half a Pint. Apply the mixture to the part burned, 5 or 6 times a day with a feather. Also keep cloths wet with it on the burn. *Linseed Oil* is nearly as good as *Olive Oil*.

ECLIPSES IN THE YEAR 1856.

Two Eclipses of the Sun, and two of the Moon, this year, the latter visible.—I. A total Eclipse of the Sun, April 20th, visible early in the morning. II. A partial Eclipse of the Moon, April 20th, visible early in the morning. III. An annular Eclipse of the Sun, Sept. 28th, invisible.—IV. A partial Eclipse of the Moon, October 13th, in the evening, visible. Magnitude, 11 976 digits on the southern limb. Beginning of the last Eclipse will not be visible in the United States.

DR. JOHN BULL'S COMPOUND FLUID EXTRACT OF SARSAPARILLA

Combines all the medicinal virtues of BURDOCK, YELLOWDOCK, DANDELION, and PURGATIVE HON-DURAS SARSAPARILLA, and is the most potent BLOOD PURIFYER in the Known World. For the cure of SCROFULA, Rheumatism, Gout, Dropsy, and all chronic Diseases it has no equal.

Price : One dollar per quart bottle

DR. JOHN BULL'S BALSAM OF WILD CHERRY AND ICELAND MOSS.

And other valuable ingredients. This preparation is the concentrated essence of the far famed WILD CHERRY BARK, added to which are the essential properties of some Roots and Barks never before used or known in medicine. It addresses itself immediately to the LUNGS (the seat of all consumptive diseases), and is allowed to be the most safe and certain cure for consumption ever known in this or any other country.

Price : One dollar per quart bottle.

DR. JOHN BULL'S KING OF PAIN

Is the GRAND Master of all acute Pains in whatever form they may come. It was the most successful remedy used during the prevalence of that awful scourge, THE ASIATIC CHOLERA, and was never known to fail in curing where used in time (see advertisements and certificates in this book).

Price : 25 cents per bottle, 50 cents large bottles.

DR. JOHN BULL'S VEGETABLE TONIC PILLS

A certain cure for FEVER AGUE, and all diseases arising from a torpid state of the Liver ; preventing Bilious Fevers, Remittent Fevers, Dumb Ague, &c.

Price : One dollar per box.

The above valuable preparations
ARE SOLD BY
